New Washington Asparagus

GARDEN ROOTS

These crops are moneymakers when sold on local and Roadside Markets
NO GARDEN COMPLETE WITHOUT THEM. A FINE COLLECTION
 No Other Page in Our Catalog Offers More for the Money

ASPARAGUS

Colored Leaflet on Asparagus Culture Free

A deep, rich soil is indispensable to secure large, heavy stalks. Plant in rows three feet apart, with the plants two feet distant. Set so that the crowns are about three inches below the surface. Top dress annually in the fall with stable manure and fork under in the spring.

The New Washington Asparagus

The New Martha and Mary Washington strains are the very finest you can plant and they are practically rust proof. It makes a heavy growth, is ready to be cut early and continues over a long season. Even though you already grow Asparagus, add one or both of the varieties to your planting and you will be more than pleased with the superiority of this New Washington Asparagus.

CARFF'S Choice Rhubarb

Colored Leaflet on Rhubarb Culture Free

Pie Plant or Wineplant

Indispensable for home use in making pies, sauce and as a general spring tonic. Should be in every home garden. A most profitable crop for market in field culture or forcing. Our select strain of the Linnaeus variety is early and produces large tender stalks with good color and high quality. Price, 15c each; \$1.25 per dozen postpaid; \$3.50 per 100; \$30.00 per 1000 by express not prepaid.

American Persimmon

A rich spicy fruit, delicious in flavor and highly prized when gathered after the frosts. These trees are native of the U. S. and can be grown entirely satisfactorily on the home grounds. Price, 18 inch plants 40c each; \$3.50 per 10 postpaid.

Japanese Persimmon

These fruits are considered the largest and highest quality of all persimmons. They are very attractive orange red color, mild and delicious flavor. Not hardy in the most northern states. Tanenashi is considered the best of these oriental varieties and we can supply them in 4 ft. trees for 75c each; 3 for \$2.00 by express not prepaid.

CARFF'S Money Maker HORSE RADISH

MALINER KREN—This new variety makes an enormous yield and is so early that it can be marketed before the common kind is ready, besides, the roots are much larger and whiter. The roots sell readily on market, and yield as high as 4 to 6 tons per acre. It requires about 10,000 sets for an acre, and the crop is ready for the market the first year. It is easy to grow, every plant will live. Try at least 1,000 sets if you cannot plant an acre. It is ready sale in any of the large cities. Price of good roots, \$1.00 for 25; \$2.00 per 100, postpaid; \$10.00 per 1,000, by express.

Holt's Mammoth Sage

Plants of strong growth of unusual substance, strong flavor and of superior quality. Prefers a rich, moist loam. Price 15 cents each; \$1.50 per dozen, postpaid; \$8.00 per 100, by express.

Miscellaneous Garden Plants

Prices, 20c each; 10 for \$1.50 postpaid; \$10.00 per 100.

Spearmint

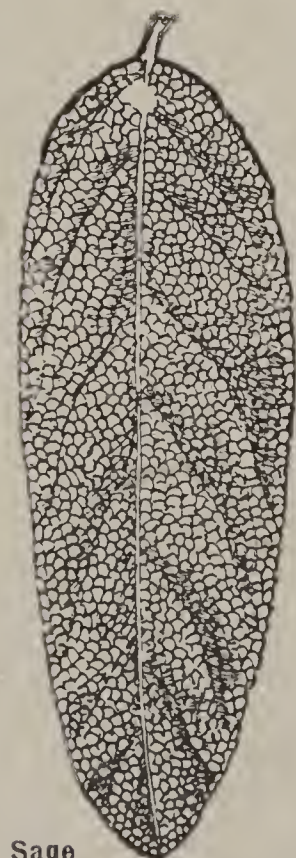

Valuable for flavoring, tea, etc. A few plants should be in every garden.

Hop Vines

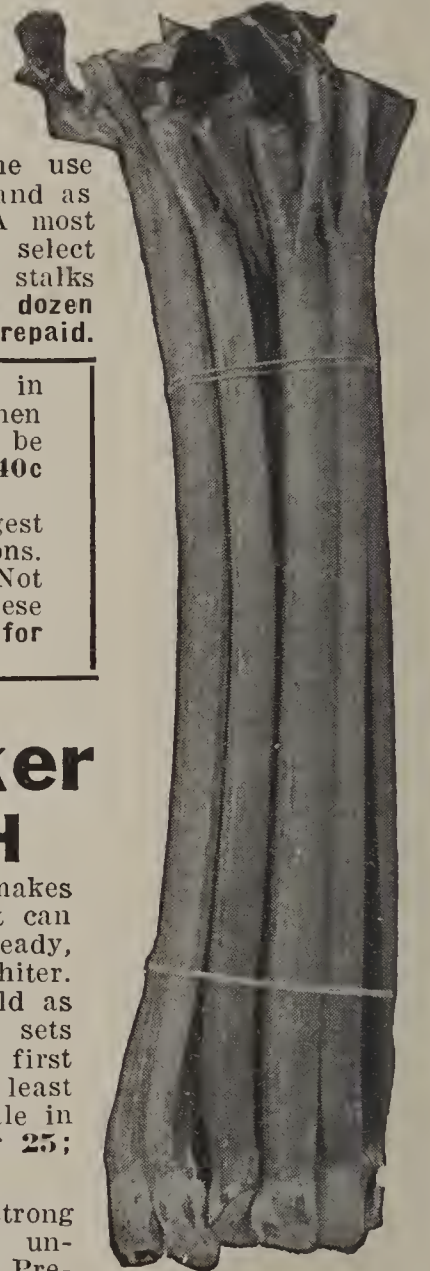

A widely planted herb and also makes an excellent arbor or screen plant.

Sweet Anise

A very aromatic herb commonly used in medicine, cookery and for flavoring.

Sage

Linnaeus Rhubarb

W. N. Scarff's Sons,
 Gentlemen:

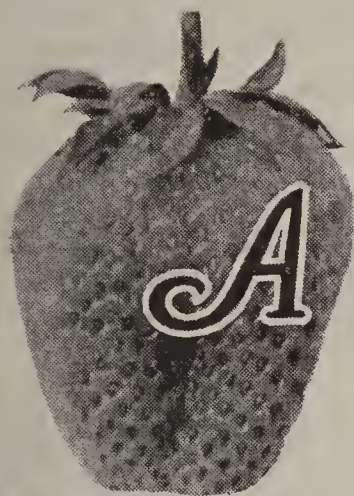

Of all the catalogs received this spring, yours seems to offer the surest returns from small fruits.

EMMA S. LEE, Georgia.

March 7, 1935.

ENTRANCE TO SCARFF'S NURSERY AND SEED FARMS

FRUIT GARDEN FOR EVERY HOME

Our 1936 Catalog of fruit plants, farm seed, etc., comes to you with our greeting. During the past season our products have again proven their merit and profit to our customers as is evident by the great number of letters of praise we have received. You will probably receive many Catalogs this year listing many varieties of fruit, ornamentals and

farm seed but just remember that Scarff's Catalog is offering only the best in each class—the varieties new and old that have proven their superior merit year after year—the kinds that produce the most and the finest crops of fruit and grain, that thrive and show the most natural disease resistance.

GUARANTEE. We warrant our nursery stock true to name, with the express understanding that should any not prove so, we will refund the money paid or replace it with other stock, but are not liable for damages beyond this. A sure indication of the purity of our stock is the fact that we have customers who have sent us orders year after year, since the issue of our first catalog. We pack carefully and will guarantee all plants in good condition on arrival.

CLAIMS. ALL CLAIMS OR COMPLAINTS MUST BE MADE WITHIN 10 DAYS FROM RECEIPT OF STOCK. NO ATTENTION TO CLAIMS OR COMPLAINTS AFTER SUCH TIME HAS EXPIRED.

The living of trees and shrubbery is largely dependent upon conditions of weather and after-care beyond the nurseryman's control; therefore, we do not guarantee any stock to live after leaving the nursery in good condition.

We allow you 10 days to test it any way you see fit, and if at the expiration of this time it is not entirely satisfactory, return it to us promptly by freight. Send us the bill of lading and we will refund your money, but we do not warrant in any way, express, or implied, the contents, or the description, quality, productiveness, or any other matter of any seeds or plants sold by us and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on the above terms, he must return them at once, and money will be refunded.

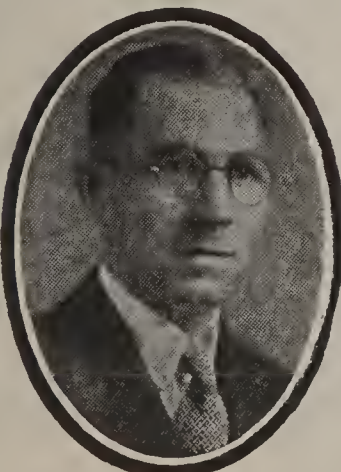

Our Terms: Payments invariably in advance, or one-fourth down, balance C. O. D.

In our Farm Seed Department there have come new and heavier yielding varieties of all farm crops which we have added to our list from time to time but not until they have been grown and have actually proven their value on our own farms. We have equipped our Seed House the best possible way to care for our seed as it should be taken care of to hold its vitality in the original state.

PURE SEED OF STRONG VITALITY IS THE FARMER'S BEST CROP INSURANCE

With the advent of Hybrid Sweet and Field Corn into the commercial field will have to come a complete reorganization of our production methods. So startling are the increases in yield, resistance to disease and ability to withstand other factors necessary to produce bumper crops that the demand already is overwhelming. We are trying to meet this demand and offer to you the best of the Hybrids.

We wish to sincerely thank all of our customers many of whom have been with us for years, for their patronage and we also welcome you who will send your first order to us this year.

Scarff's Fruit Plants Are Better

1. **50 YEARS OF FRUIT GROWING.** For almost a half century we have been growing Nursery Stock, testing and fruiting thousands of varieties and are now offering the best of these to our customers. Our soil is well adapted to growing fruits and experience has taught us how to produce good strong well-rooted plants.

2. **DISEASE FREE PLANTS.** One of the first steps in successful fruit growing is to secure healthy plants free from insect and disease injury. Our Nurseries are inspected **twice** during the growing season by competent deputies of the Ohio Department of Plant Industry and each shipment of Nursery Stock carries our State Certificate. Several of our New Raspberries are quite resistant to disease and are better able to withstand drouth and other adverse conditions.

3. **THE OHIO SMALL FRUIT IMPROVEMENT ASSOCIATION.** Many of you are familiar with the work of this berry growers' association in Ohio. Cumberland, Black Beauty and Plum Farmer Raspberry plants from these plantations have not only received our regular Ohio Inspections but in addition receive 3 to 5 additional inspections by a Specialist on Raspberry diseases. If any diseased plants are found they are burned in place with a gasoline torch.

These plants are sold as **REGISTERED** plants and are the cleanest plants available anywhere. Scarff's Nursery is a distributor for this Association.

4. **NEW AND BETTER FRUITS.** As you read our Catalog you can readily see that we are offering you the "Best there is in Horticulture." This means added satisfaction and profits to our customers. We are fruiting many of these New Varieties here on our Farms and it is gratifying to note how much superior they are to many of the "Old time-worn Varieties"—and how much more readily they sell at at our own Farm Market.

5. **"SUCCESSFUL PLANTING"** is our New Cultural Booklet which is sent out free with every order. It insures the proper planting and after care which are essential to successful growing of all Fruit and Oramental plants.

6. **"HEAVY BEARING AGE PLANTS."** We can supply these extra heavy plants in most varieties of our Bramble fruits and they usually produce some fruit the first year.

COMMERCIAL PLANTERS. Our plants have all been State Inspected and Certified free from disease. They are carefully grown, full of life and vigor and we guarantee them to be as fine as can be secured. They will grow and make you money.

Scarff's Farm Market—Fruit and Vegetables in Season

Our direct farm market—Producer to Consumer. You are always welcome and we know that you will be delighted with the quality and reasonable prices of our products. Located at the intersection of Federal Route 40 and State Route 69. We invite your patronage.

W. N. SCARFF'S SONS

NEW CARLISLE, OHIO

EVERBEARING STRAWBERRIES

A Luxury for the Home Garden

Most Profitable in a Commercial Planting Under Irrigation

Plant Scarff's Everbearing Strawberries and have delicious fresh fruit from early spring until the snow flies in the fall. Plant them in good rich soil and if possible provide to water them during the dry hot summer and resulting fruit will more than gratify you.

GEM This is the New Everbearing Strawberry that tops them all. Produces plenty of large delicious flavored berries which start coming after other strawberries finish fruiting and keep producing until the snow flies. It surpassed other Everbearing varieties in that it thrives on all soils and throws out plenty of "runner plants" thus making a heavy fruiting row which begins to bear fruit six months after planting.

Gem berries are all well rounded in shape, a striking red in color, seeds few and the flavor is outstanding—sweet and juicy—lacking the acidity of most other everbearers. Here is the berry to plant for home use or for profit.

Plant any of the varieties of strawberries we are offering. Give them good care and you can depend on them producing plenty of large delicious berries like these.

Remember you may have strawberries—large—delicious and sweet—the very first summer after you set the plants. Order the plants early and keep the blossoms pinched off for the first few weeks and either the Mastodon or Gem varieties will produce a fine lot of berries in three or four months after planting.

These everbearing varieties require plenty of moisture and if water is not available it is best to mulch well around each plant with good clean straw or other suitable material.

MASTODON Has long been the most desirable Everbearing Strawberry ever introduced. Produces three heavy crops in 18 months. The plants set in early spring start bearing in late summer and continue until November. The second crop is picked the following June, the third crop comes in the autumn of the same year.

We can strongly recommend Mastodon for garden planting. It is a thrifty grower, produces an abundance of large, delicious berries. 100 plants set in April or May will start to bear in three months and supply the average sized family with an abundance of berries for table use.

CARE OF PLANTS

Set the plants on arrival if possible. Otherwise unpack to prevent heating and keep the roots moist and crown and tops dry, placing in as cool a place as available.

Water the plants when setting. Cut off most all of the leaf surface and use care to get the plants at the right depth—so the upper portion of the crown is just above the ground. Careful hoeing and "scuffling" around the plants is essential to a good start.

STRAWBERRY PRICES

Premier	.60	1.10	4.00	7.00

Orders for 100 plants or less are sent by mail postpaid. Larger quantities by express not prepaid, or if by mail send 15 cents per 100 extra.

CATSKILL Not an everbearing variety, but Catskill is a most promising midseason variety that was originated at the New York Experiment Station and seems especially adapted to the northern half of the U. S. The berries average very large and their showy brilliant red color contrasted with the bright green cap gives them striking beauty—which is most attractive to both the grower and the buyers. They are firm and hold up well in marketing. Catskill is a thrifty grower, making an excellent fruiting row, and is a most productive variety under normal conditions.

Gentlemen: Am very much elated over the Brainerd Blackberries which I bought of you last spring. Never saw berry vines make such a growth in one season. Some of the vines have trailers six and eight feet long. They started bearing in July and have been at it ever since. Even at this late date there are many nice clusters of berries. Are these supposed to be Everbearing?

E. H. RUBOW—Oct. 21, 1935—Kansas.

I think your New Raspberries are the nicest and best I have had in 20 years—especially the New Logan.

C. K. STEMPEL—July 15, 1935—Ohio.

Last year I bought 1,000 Chief Raspberries from you and in spite of the drouth which we had your plants made a fine showing.

O. J. WILLIAMS—February 9, 1935—Missouri.

STRAWBERRIES

Plant Scarff's Strawberries

Most Delicious for Home Use—Greatest
Money Makers for Market.

Grand Champion (Per.)

Greatest Money Making Strawberry
Ever Introduced

NO CROP FAILURES BY FROST -- OVER 5000 QUARTS ON 1/2 ACRE

The extra large size berries of rich red color and high quality attract the fancy berry buyers. Heavy foliage and long blooming period provide ample protection against frost. The first berries ripen early and continue over a long period competing with and surpassing Aroma, the standard medium late berry, in both size and quality. For canning and preserving these Grand Champion are outstanding as they are coreless and retain their shape and flavor in the can. You can depend on our stock being genuine as our original planting was direct from the introducer who, by the way, claims over 5000 quarts to 1/2 acre for this remarkable new strawberry.

ABERDEEN (PER.) has recently come into wide favor as the finest and most profitable midseason variety and we can highly recommend it to follow Premier. Fruiting tests have shown it to outyield all other varieties of its season. The berries are large and attractive, excellent quality and are typically "strawberry flavored." Jam or preserves made from the berries are an attractive light red color.

AROMA (PER.) Genuine Aroma is still held in highest esteem by many growers as a midseason variety. Grand Champion is now a strong competitor in this season and both of these varieties can be depended on for plenty of fine berries at a time when the flood of early berries is off the market.

BLAKEMORE (PER.) Succeeds under a wide range of soils and climate conditions. The plants are very vigorous in growth and resistant to leaf spot. They ripen about the same season or a few days earlier than Premier, about the same size, equally as productive. Berries are bright red, hold their color and do not shrivel on standing after picking.

PREMIER (Per.) The Premier is one of the most popular varieties that we offer and it well deserves all the praise that can be given it, for several reasons:

1. Premier is the first to ripen.
2. Fruit large size and deep red color.
3. Firm flesh and excellent quality.
4. Heavy yielder and makes thrifty growth.
5. You can depend on Premier for a good crop when other varieties are a failure.
6. Foliage is not susceptible to the leaf spot which has ruined many strawberry patches.

DORSETT-FAIRFAX (BOTH PER.) These two new U. S. Department of Agriculture introductions are truly the aristocrats of all strawberry varieties. Both are large, strikingly beautiful and extremely heavy producers; in fact they have outyielded all other varieties in test blocks.

DORSETT is the early variety surpassing Premier in quality, production and profit.

FAIRFAX is supreme in quality—a flavor you can't forget. Berries intense bright red, with waxen luster and are outstanding for the home garden and local market.

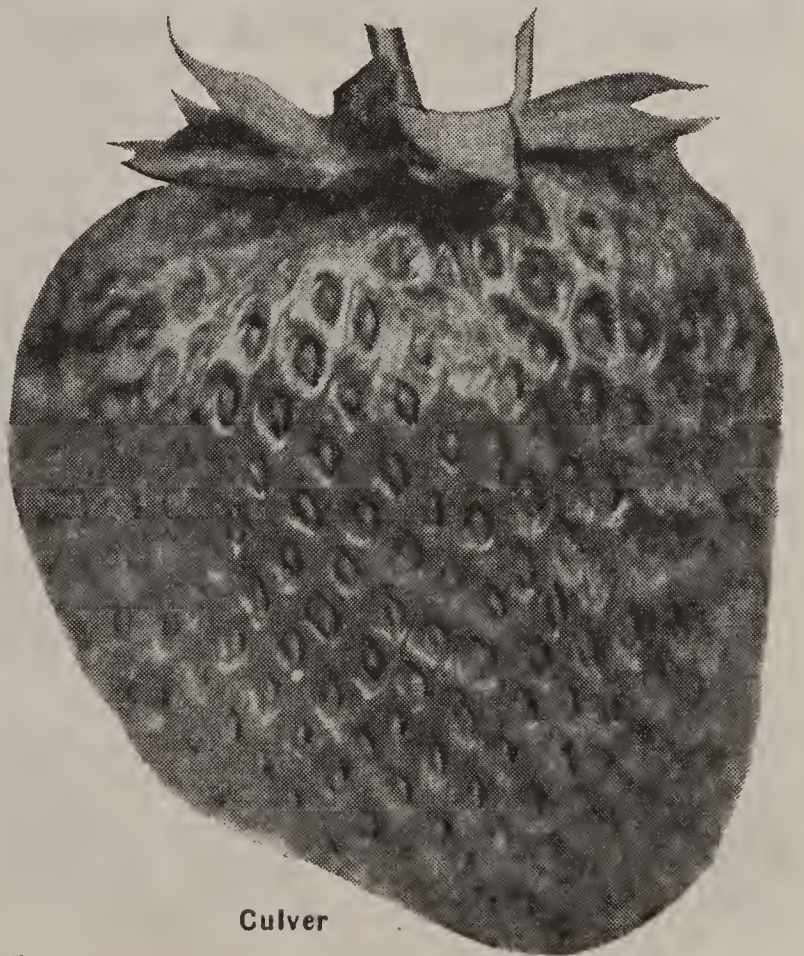

CLERMONT and CULVER

These are the two outstanding varieties from the N. Y. Agricultural Experiment Station.

Clermont is noteworthy for its very striking beauty, high quality and most attractive fruits that hold up in size throughout the season and so glossy almost to look like they had been varnished.

Culver is already meeting with success in several berry sections and one grower reports: "It is the most profitable strawberry I have ever fruited." Similar to Clermont in size, quality, and almost as attractive. A very heavy producer but is more desirable for home markets than for shipping.

SEE PAGE 4 FOR PRICES ON STRAWBERRIES

Culver

Registered Disease Free Raspberry Plants

GROWN BY THE OHIO SMALL FRUIT IMPROVEMENT ASSOCIATION

PLUM FARMER

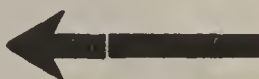

The first step in successful fruit culture is to secure strong, disease-free plants.

PLUM FARMER An early black-cap ripening about one week before the Cumberland. Fruit large, broadly rounded and firm, of good quality. The plants are vigorous and very hardy; productive, especially at the first two or three pickings.

BLACK BEAUTY A new variety outstanding because of its thrifty growth, large berries and comparative resistance to the Raspberry diseases. See page 7 for more complete description of Black Beauty.

Look for This Seal

Each bundle of 25 plants carries one of these linen tags. It guarantees satisfaction.

Prices: Registered Raspberries

25 Plants, postpaid for.....	\$ 1.25
50 to 250 Plants, per 100.....	2.75
250 to 1000 Plants, per 1000.....	18.00

Black Beauty—25c per 100 and \$2.00 per 1000 higher than above prices.	

The production of "registered disease free Blackcaps" is one of the outstanding steps in horticultural advancement during recent years. The setting of strong healthy disease free plants is one of the first essentials in starting a profitable raspberry plantation. To our knowledge these plants grown by the Ohio Small Fruit Improvement Association and distributed by Scarff's Nursery are the only ones available from any source in the U. S. that are "Registered Disease Free Stock."

THE BEST COMMERCIAL GROWERS find their greatest profits in setting and maintaining disease free Raspberry patches.

There is too much at stake for them to plant anything but the best.

Through this registered stock you are given the opportunity to secure the finest and cleanest Raspberry plants available from any source—and at new low price.

The Planting of Registered Disease-Free Raspberry Plants Insures

1. Better stands
2. Better yields
3. Long lived plantations
4. Larger and better flavored fruit
5. More profits
6. Satisfaction

At the urgent request of the leading raspberry growers, the Ohio Agricultural Experiment Station, the United States Department of Agriculture, and the Extension Department of the Ohio State University cooperating, started experimentation ten years ago to determine if it was possible and practical to produce virus disease-free raspberry plants. This work was made necessary by the fact that many raspberry growers, both large and small, were being forced out of business by "running-out" diseases. It was found that by starting with disease-free plants and that by using proper isolation, vigorous roguing, and frequent critical inspections, plants could be maintained in a state of high vigor and productivity. The growers, cooperating in this work, organized themselves into the Ohio Small Fruit Improvement Association in order to better enforce the high standards of inspection and roguing necessary. This association now has ready for distribution a quantity of registered disease-free plants of the Plum Farmer, Black Beauty and Cumberland varieties. As work progresses additional varieties will be added to this list. The Scarff's Nursery is cooperating with this project in distributing these plants.

CUMBERLAND The standard mid-season black-cap for home and commercial use in most localities. The berries are large, attractive, conical, firm and of excellent quality; rich and sweet. The plants are vigorous and hardy and very productive throughout a long picking season.

Black Beauty Raspberry

**A BETTER VARIETY
OF THE
CUMBERLAND SEASON
HEAVY YIELDING, LARGE
SIZE, EXCELLENT QUALITY,
THRIFTY GROWTH**

These good characters along with its comparative freedom from Mosaic and other virus diseases make Black Beauty truly a Blue Ribbon Raspberry.

SCARFF'S HEAVY 2 YR.
OLD BEARING AGE BLACK
RASPBERRY PLANTS. SEE
PAGE 9 FOR VARIETIES
AND PRICES.

Price, Black Beauty, \$1.50 per 25, postpaid; \$2.65 per 100; \$9.00 per 500; \$17.50 per 1000, by express, not prepaid.

OHIO CERTIFIED RASPBERRY PLANTS

Scarff's Raspberry plants have all been twice inspected by the Ohio Dept. of Plant Industry during the growing season, and certified as apparently free from injurious insects and diseases. You can depend on these plants being as fine in every respect as it is possible to secure.

QUILLEN: Prices same as Black Beauty.

Description of Black Beauty

1. Growth upright and one of the thriftiest growing varieties we have ever seen, so that planting distance should be increased to about 4-7 feet.
2. Hardier than Cumberland.
3. Fully as productive or more so than a good clean field of Cumberland.
4. Ripens in mid-season; berry large, firm, black, and with very little greyish bloom. Does not crumble.
5. Quality excellent.
6. Black Beauty is showing marked resistance to Mosaic, curl and the other virus diseases, and this is one of its outstanding good qualities.

Logan Black Cap

Highly Resistant to Mosaic and Other Virus Diseases

Every grower of Black Cap Raspberries should have a good block of this Logan variety. It is the best early Black Cap grown, and besides it yields as heavy a crop as any midseason variety. It withstands dry, hot weather better than other Black Cap and this was especially apparent during this past summer.

Most Dependable Black Raspberry

The Logan is not a new variety here in Ohio as it has been grown for a number of years in one of our largest commercial berry sections. Among these growers this variety through sheer merit has replaced other standard kinds until at present more than three-fourths of the plantings are New Logan. The berry ripens one week earlier than Cumberland; it is a heavier yielder and the glossy black berries are as large as that variety. It holds well through drought and in fact the last picking has always proven as fresh and free from seediness and tendency to crumble as the first.

New Logan Black Cap
Raspberries

Price, Strong Tip Plants, \$1.25 per 25, postpaid; \$2.50 per 100; \$8.50 per 500; \$16 per 1000, by express.

Highest Prices on Early Market

RESISTANT TO MOSAIC AND OTHER RASPBERRY DISEASES

One of the New Logan's outstanding characteristics is its resistance to Mosaic and other raspberry diseases. It seems to outclass all other black raspberry varieties in this respect and this is one of the primary reasons why it is gaining popularity among the growers who depend on black raspberries for their livelihood.

We have a fine lot of absolutely disease free New Logan tips to offer for early spring.

BRISTOL This is one of the New Varieties from the N. Y. Agr. Experiment Station. It has shown itself to be one of the most promising early black raspberries on the Station grounds. Fruit is large and attractive glossy black color, firm and good in quality. Vigorous and produces very heavy crops. Supply of plants very limited. Price, \$2.50 per 25 postpaid; \$5.00 per 100 by express.

CUMBERLAND This variety has long been the standard of excellence among black raspberries, and still deserves an extremely high place. Berries are large, quality the best and a good heavy yielder. Price, \$1.25 for 25, postpaid; \$2.50 per 100; \$8.00 per 500; \$15.00 per 1000, by express.

NEWBURGH WORLD'S FINEST RED RASPBERRY

Very Large Size, Highest Quality, Heavy Yielding, and Freedom from Mosaic. These qualities make it the most desirable variety for market or home use.

NEWBURGH
A Remarkable New Red Raspberry

Growers Praise Newburgh

I have fruited Newburgh four years and find it the hardiest, meatiest berry I have ever grown and its size is the largest—and I had 38 new and old varieties in one patch for test.
BRANT BERRY FARMS, N. Y.

Yield on Newburgh was 30 per cent greater than Latham—the greatest difference was in size and quality. Newburghs averaged larger and were a lighter red—they do not darken or mould in the crates.
WM. KLING & SONS, N. Y.

I am well pleased with the Newburgh plants ordered from you—such plants and immense berries—every plant is loaded down with fruit.
LOUIS MALVITZ, Pa.

I observe you mention Latham as your standard of comparison. Latham is one grand berry and I have been growing it for several years, but I am going to say with all its good points it is going to be extensively replaced with Newburgh. As to quality I want to say that whenever we had any of the Newburgh fruit on the road stand along with the Latham the former was always sold out first and at 3c more per quart.
W. HALBERT, N. Y.

Newburgh not only leads the field of red raspberry varieties in its desirable fruit characteristics and productivity, but it has also proven itself to be practically immune from Mosaic, the most dreaded raspberry disease.

The introduction of Newburgh by the New York Experiment Station marks a decided advance in red raspberry varieties and all indications are that Newburgh will in time become the leading commercial red raspberry.

Description of Newburgh:

1. Has so far proven immune to Mosaic.
2. Very productive.
3. Fruit very large and holds its large size over an unusually long season.
4. The flavor is mild and quality good, decidedly better than Latham.
5. Berries are attractive bright red, very firm and do not crumble like those of Latham.
6. Season of ripening is a few days earlier than Latham.
7. The plants are vigorous, medium in height; canes stocky and well branched.
8. Extremely hardy.

Price, 20c each; \$1.25 per 12; \$2.00 per 25; postpaid; \$3.50 per 100; \$25.00 per 1000, by express.

LATHAM Most Popular, Most Widely Planted of

All Red Raspberry Varieties

Latham is a thrifty growing plant, a very heavy yielder of large, bright red, attractive berries of firm texture and high quality. The fact that it thrives and has proven profitable under such a wide range of conditions is the reason for its universal popularity. We can recommend Latham as one of the best midseason varieties for every section of the U. S., and for either home or market planting and know that it will give satisfaction.

5430 quarts per acre is the report of three year tests by Connecticut Agricultural College. Figure the returns at 20 to 25c per quart.

Price of Latham
Twice Inspected —
Certified disease-free
plants: 15c each;
\$1.25 per 25, post-
paid; \$2.50 per 100;
\$8.50 per 500;
\$16.50 per 1000.

Fruit of Latham almost one inch in diameter, ripens in midseason, extremely hardy and easy to grow.

FLAMING GIANT

**Large, Sweet, Brilliant Red Raspberry
for the Home Garden**

SPECIAL---AT NEW LOW PRICES

**Ironclad
in
Hardiness**

**Tremendously
Heavy
Yielder**

FLAMING GIANT (Ohta)

Fruit large size, beautiful bright red—high quality. Excellent for preserves, canning and other culinary purposes. Special low prices: 50c per 10; \$1.00 per 25 postpaid; \$2.50 per 100; \$15.00 per 1000 by express.

LLOYD GEORGE We have a very few plants of this large high quality English raspberry. Price, 25c each; \$1.50 per 12; \$2.50 per 25; \$6.50 per 100 postpaid.

SATISFIED CUSTOMERS—Best Advertisement

I wish to say that the plants I received from you last spring lived (every one), which I think is very fine indeed. I have mentioned the fact to my friends.

Sept. 6, 1935. Geo. E. Franke, Indiana.

The St. Regis and New Logan berries that I ordered from you a year ago last spring are astonishingly productive.

Nov. 15, 1935. Mrs. J. F. Bullitt, Virginia.

Famous Whitesbog Blueberries

Delicious in Flavor—Profitable—Very Ornamental

Large clusters of sapphire blueberries; plump, tender, practically seedless, the size of grapes and far superior to the wild Blueberries in flavor.

They are easy to grow. They beg to be eaten—fresh with cream or in any of the multitude of ways in which wild Blueberries are served.

DELIGHTFULLY ORNAMENTAL No shrub is of greater beauty the year round than the Blueberry. During the summer the foliage is a deep, rich satiny green, and against this background hang clusters of berries royal in their magnificence. The leaves are crimson and a bronze in autumn and twigs red in winter. In the spring are the pink buds and the white flower bells.

Price, strong plants, finest varieties developed by U. S. Dep't of Agriculture, \$1.60 each; \$15.00 per 10, postpaid.

Two plants should be set to insure cross pollination. We will supply two varieties when more than one plant is ordered.

Whitesbog Blueberries prefer an acid soil containing an abundance of peat or other partially rotted vegetable matter. They also need a moderate supply of moisture and good drainage. If your soil is not already acid this condition may be created easily by mixing with the surface soil and a liberal quantity of peaty material such as acid peat, partially rotted leaves, pine needles, sawdust or chip dirt from an old wood pile. A surface mulch of leaves or straw each year is also beneficial to hold an even soil moisture.

POTOMAC

Most Productive of All Raspberries

A BRAND NEW BLUE RIBBON RASPBERRY—Introduced by the U. S. Department of Agriculture

Here are the reasons why Potomac is an outstanding variety:

1. It is proving to be the heaviest yielding of all raspberries.

2. Comparable to Latham Red in size and firmness of fruit.

3. Quality is excellent—making an excellent jelly without the addition of pectin and making a jam supreme.

4. Vigorous, healthy growth, exceptionally resistant to Anthracnose and Leaf Spot and to our knowledge it has never shown any traces of the Mosaic disease.

5. Potomac is far better than any other purple raspberry we have ever grown.

NEW LOW PRICES ON POTOMAC THIS YEAR

6. Hybrid between Farmer Black and Newman Red with that extraordinary vigor and fruitfulness sometimes displayed by hybrids. Potomac is adapted either to the red or black raspberry country and that means either to the north or the south.

More and Larger Fruit than Cumberland

A fruiting row of Cumberland alongside of Potomac showed 10 to 12 berries on a lateral as compared with an average of 20 to 25 berries on a lateral of Potomac; and besides, the Potomac has many more canes and many more laterals than Cumberland. Counting the berries in a heaped quart of the two varieties, 360 berries of the Potomac filled the measure, while 400 were required for a quart of large size Cumberland.

Potomac

Scarff's Potomac are genuine. Do not accept a substitute.

Price, POTOMAC 1-yr. plants, 20c each; \$1.25 per 12; \$2.00 per 25 postpaid; \$4.00 per 100; \$35.00 per 1000 by express.

BEARING AGE POTOMAC—See page 9 for prices.

COLUMBIAN The leading commercial variety in the Great Lakes section. Midseason, vigorous, and productive. Berries dark, fairly firm; rich sprightly flavor.

CARDINAL The most satisfactory purple for central Ohio and south. Price, Columbian and Cardinal, \$1.00 per 12, postpaid; \$3.00 per 100; \$25.00 per 1000.

CHIEF —Best Early Red Raspberry High Quality—Heavy Yielding

Equal in quality and out-yields Latham 20 per cent. Ripens 10 days earlier and puts the grower on the market for highest prices. Plant Chief for the early crop and Latham for midseason and you have a combination hard to beat either for profit or the home garden.

ST. REGIS Everbearing Red Raspberry.

Bears in 80 days from planting. The most popular everbearing red raspberry ever introduced because it actually does bear a big crop of luscious fruit in June and begins again in September, and bears continually until killed by hard freezing. Price, good strong plants, 15c each; \$1.00 per dozen, postpaid; \$2.50 per 100; \$17.50 per 1000.

VAN FLEET Pre-eminently a variety for the Southland where other red raspberry varieties succumb to the extremely hot summers. Ripens after other red raspberries are gone and continues in season about five weeks. Price, \$1.25 per dozen; \$4.00 per 100; \$30.00 per 1000.

GOLDEN QUEEN The yellow raspberry. Quality of berries is excellent, canes hardy, prolific and thrifty in growth. Resembles Cuthbert except that the fruit is a clear golden yellow. Price, 20c each; \$2.00 per 12; \$3.25 per 25, postpaid; \$7.50 per 100 by express.

CHIEF—the Country's Greatest Early Red

1. Ripens ten days earlier than Latham.
2. Yields 13 to 50 per cent more than Latham (State Test).
3. No winter injury under most trying conditions.
4. Holds up for a long period after packing.
5. Is practically resistant to Mosaic.
6. Quality is somewhat better than Latham. The fruit is the same bright red color and firmness but size is not quite equal to Latham, being about the same as a well grown King. We predict a great future for Chief.

Price, \$1.25 per 25, postpaid; \$2.50 per 100; \$9.00 per 500; \$16.00 per 1000

Our plants of Chief are the finest that grow and are absolutely free from disease.

We excel in growing fine Blackberry Plants. Our assortment is perhaps the largest of any grower in the United States. Our plants are heavy fruiting strains and as fine as can be grown. You make no mistake in ordering your Blackberries of us, as both our price and stock are right. Our plants will make you big money.

ALFRED—The Mammoth New Blackberry—Practically Coreless

HIGHEST QUALITY—LARGE JET BLACK BERRIES—EXCEEDINGLY PRODUCTIVE

These are a few characteristics of the New Alfred Blackberry. This New Variety is taking first place in the plantings of the best commercial growers, producing larger crops of finer fruit than Eldorado, Blower and the other old reliable kinds.

For the Home Garden, Alfred is the ideal Blackberry. Think of a bush loaded with tremendously big Jetty Blackberries from $1\frac{1}{2}$ to $1\frac{3}{4}$ inches long, practically free from seeds, coreless and with a pulp fairly bursting with juice. That's Alfred. Price of heavy plants, \$1.25 per dozen; \$2.00 per 25, postpaid; \$3.00 per 100; \$22.50 per 1000.

EARLY HARVEST 150 bushels of "Scarff's Fruiting Strain Early Harvest" from one acre sold as high as \$4.00 per crate. The earliest to ripen and the most productive of the early sorts. There are a number of different strains of Early Harvest Blackberries, all alike in appearance of wood and growth, but vastly different in productiveness. We noticed this peculiarity soon after its introduction, and have, by careful system of selection, selected a strain that is simply marvelous for great yields of luscious fruit. We have not only increased the productiveness, but size as well, and now have an early variety that cannot be excelled, as it ripens so early that it always sells at enormous prices. Price, Scarff's Fruiting Strain Early Harvest, \$1.00 per dozen, postpaid; \$2.50 per 100; \$10.00 per 500; \$17.50 per 1000.

BLOWER A very large sweet Blackberry, hardy and productive. Blower would be the most popular of all Blackberries if it were not for the fact that it is sometimes susceptible to Orange Rust. This rust can easily be controlled by digging out and burning infected plants. Price same as Early Harvest.

DEWBERRIES

LUCRETIA The berries are far larger and incomparably better than any blackberry and of unequalled excellence; soft, sweet, and luscious throughout; of brightest glossy black color. Most desirable variety for Ohio conditions. Price, \$1.00 per doz.; \$2.50 per 100; \$9.00 per 500; \$16.50 per 1000.

ELDORADO This is one of the most valuable varieties for market and home use. It is a strong, upright grower and the fruit is jet black, never coloring red after picking; fully as large again as the average Snyder berry. The flavor is excellent, imparting a rich aroma, melting and juicy with but little core. Highly recommended everywhere.

Eldorado is unquestionably one of the best commercial blackberries grown. Price, \$1.00 per doz., postpaid; \$2.50 per 100; \$10.00 per 500; \$17.50 per 1000.

BRAINERD BLACKBERRY

A New Tremendously Heavy Yielding Blackberry for the Central, Southern and Pacific Coast States

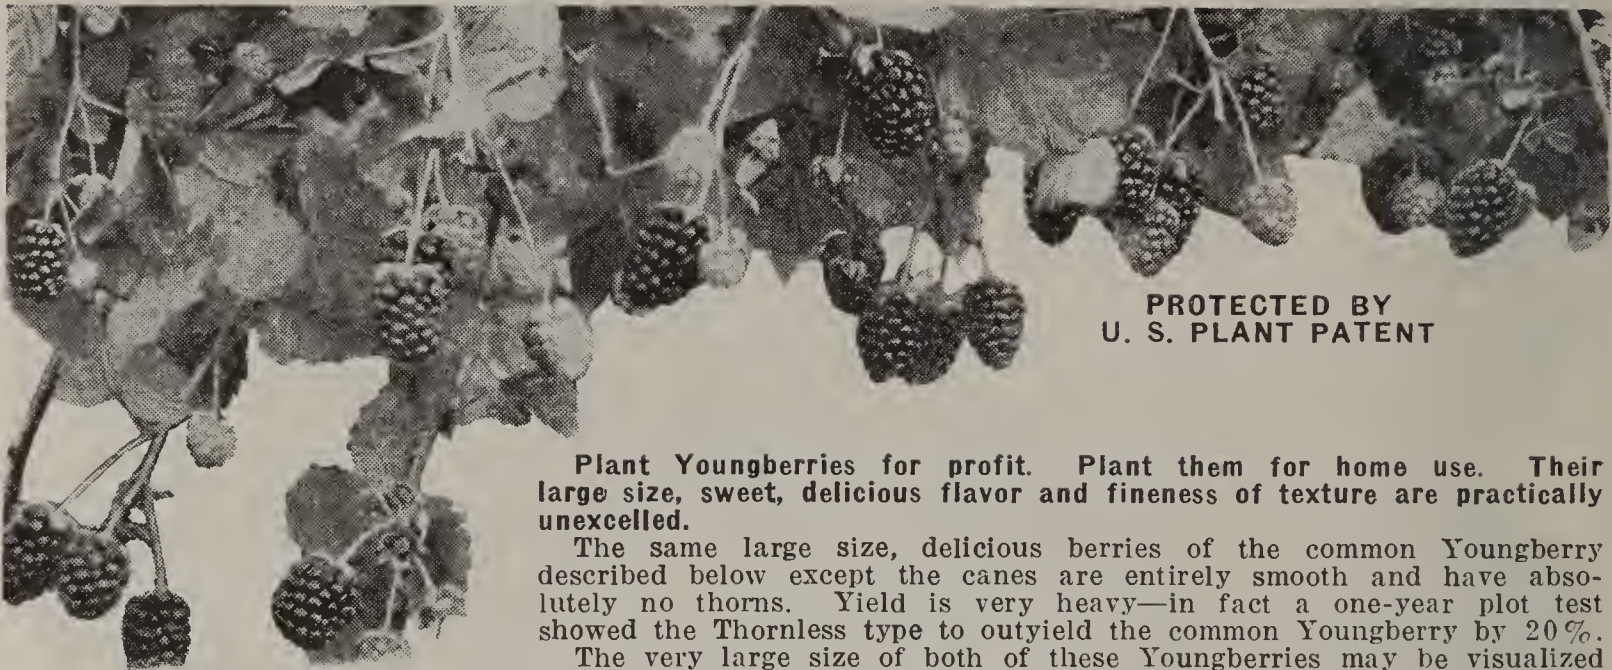

A trailing type much hardier and better in all other respects than the Himalaya. Brainerd is extremely productive of very large clusters of high quality berries when fully ripe and which contain relatively smaller seeds than other blackberries of this type. The Department of Agriculture has made numerous tests of this variety and because of its greater hardiness and tremendous yields of large, highly-flavored berries has deemed it a very worth-while variety and worthy of introduction.

Bearing Age Blackberries

Heavy two-year-old plants can be supplied in all varieties at prices 50% higher than listed above for our one-year plants.

Thornless Youngberry

PROTECTED BY
U. S. PLANT PATENT

Plant Youngberries for profit. Plant them for home use. Their large size, sweet, delicious flavor and fineness of texture are practically unexcelled.

The same large size, delicious berries of the common Youngberry described below except the canes are entirely smooth and have absolutely no thorns. Yield is very heavy—in fact a one-year plot test showed the Thornless type to outyield the common Youngberry by 20%.

The very large size of both of these Youngberries may be visualized from the report of Peter Steig, Shandon, Ohio, that he produced 25 Youngberries that filled a pint basket.

I am greatly enthused over the new giant Youngberry. It is the largest berry and prettiest dark wine color as well as the best quality of any of the briar fruits I have ever grown. Makes the finest pies and is a delicious dessert served with sugar and cream and solid enough for shipping purposes. My neighbor has one-half acre bearing its second crop from which he harvested fifty 24-quart crates which sold readily for \$3.00 per crate. This is a year when very few berries brought that figure. E. L. McJilton, Illinois.

COMMON YOUNGBERRY

The Youngberry has achieved the greatest success ever scored by any of the berry family. It not only bears very heavily, but the fruit is easy to handle, is very attractive, ships well, keeps well, cans well, and has so many commercial possibilities, and fits in so well in the home garden, that everybody should be interested in having a few vines or a commercial planting.

Youngberries thrive where any other bush fruit grow but do best in states the same latitude as Ohio and South.

CANNED YOUNGBERRIES

Ask your grocer for canned Youngberries. We note that some of the larger stores are carrying them in stock. They are delicious as they come from the can or with sugar and cream—and how they do make pies.

New Boysenberry

Boysenberry 2 inches in length. ➡

HIGHEST QUALITY OF ALL THE BRAMBLE FRUITS.
The New Boysenberry is truly a glorified Youngberry. We offer it this year for the first time because of the tremendous large size of the berries, because of its very prolific fruiting and lastly because we think that both the Boysenberries and Youngberries (both very similar in flavor) are the highest quality of all bramble fruits.

FOR HOME USE—A few Boysenberry plants will be the joy of your garden. Look closely at this picture and measure the berry. You will enjoy fruit like this and you will have something to show your friends. You will agree with us in saying they are the finest berries you have ever tasted, either fresh, canned, in jams, jellies or pies. You will be proud of your Boysenberries. Plant 6 feet apart in rows 6 feet across. You will be surprised at the berries you can get from a dozen plants.

They are just as easy to grow as blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. The fruit sells for more the first time because it looks so fine, and it sells for more the next time because the customers like it so well that they will take nothing else.
Boysenberries may be grown in Ohio and north with winter protection. South of the Ohio river they require no special protection over winter. **Prices above.**

New Red Lake Currant

Finest of all Red Currants—Large Berries—Excellent Quality—Long Well Filled Clusters of Cherry Red Fruits

Originated recently at the Minnesota State Fruit Breeding Farm, tested in many localities and everywhere promises to become the leading Red Currant for both home and commercial growers. The berry is unusually large in size and of superior quality; the clusters are long and filled out to the top and with stems sufficiently long to make picking easy. Although it ripens in early mid-season it holds up for a long period without shriveling or shelling so can be marketed at a time when prices are highest. Besides its very large fruit and heavy yielding characteristics the Red Lake has a vigorous upright growth holding its deep green foliage late in the fall. We recommend this as the world's best Red Currant. Price, 35c each; \$3.00 per 10, postpaid; \$25.00 per 100 by express.

PERFECTION A popular well-known variety largely planted for both market and home use. Plants vigorous, stocky, compact to spreading. Fruit bright red, large, juicy, and fine flavor. Price, 25c each; \$2.25 per 10, postpaid; \$15.00 per 100.

WILDER A remarkable variety; one of the strongest growers and most productive. Bunch and berry very large, bright, attractive red color, even when dead ripe; hangs in bushes in fine condition for handling as late as any known variety. Price, 25c each; \$2.00 per 10, postpaid; \$13.00 per 100.

White Grape Currant

A novelty of good substantial economic value as the bushes are strong growers and produce heavy crops of delicious, delicate, transparent colored fruit. Price, 30c each; \$2.50 per 10, postpaid; \$20.00 per 100.

Gooseberries

CARRIE (Almost Thornless.) Carrie is one of the finest varieties of Gooseberries that are now in existence. Fruit larger than Houghton, turning deep maroon when ripe; flavor excellent. Price, 25c each; \$2.00 per 10, postpaid; \$15.00 per 100.

DOWNING A large, handsome fruit, green in color; fine flavor; immense cropper and always in demand; an American variety, free from mildew. Price, strong plants, 25c each; \$2.00 per 10, postpaid; \$15.00 per 100, by express.

POORMAN GOOSEBERRIES

POORMAN The fruit of the Poorman is the largest of any of the American Gooseberries. The berries are of a good red color and are splendid eaten out of the hand. It also produces one of the largest, healthiest, and hardiest bushes of any worth-while variety. Well adapted to all except very light, sandy soil. Price, 30c each; \$3.00 per dozen, postpaid; \$20.00 per 100.

RED LAKE

GLENDALE

A new variety developed and introduced by the U. S. Department of Agriculture. It is especially adapted South of the Mason-Dixon Line and is about the only gooseberry variety that will thrive and produce satisfactorily under the dry, hot conditions of the South. Price, 25c each; \$2.00 per 10.

• • • GRAPES • • •

Every home should have a dozen or more grape vines planted on an arbor or along the garden fence. They are delicious to eat fresh from the vines; can be made into the most health-producing grape juice and jelly—well, who doesn't like grape jelly? Once planted the grape vines will continue to yield for years with practically no special attention. Our grapes are strong, well rooted plants that are sure to grow for you.

CONCORD
(Blue)

Grape. The vine is vigorous, hardy, and productive and ripens its fruit about two weeks earlier than Worden. Clusters are medium size and compact; the berries large and hang persistently; flesh is firm although quite tender and quality very good. One of the best American Red Juice varieties.

STANDARD VARIETIES

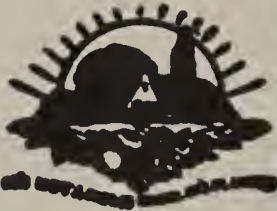

- CONCORD** (Blue.) An old variety; does well wherever planted; good size; productive.
- CATAWBA** (Red) One of the best grapes in cultivation. Bunch large and compact; a strong grower and very productive; quality good.
- DELAWARE** (Red.) A small red Grape, compact bunch, that is considered the acme of quality for eating and highly desirable for wine.
- MOORE'S EARLY** This is really an early Concord and is the standard early blue grape. The vines are vigorous, healthy and productive bearing grapes, delicious quality.
- NIAGARA** (White.) The most popular white grape in existence. Fruit large and very productive; a good grower, ripening same season as Concord, equally good, valuable in every way.
- WORDEN** A large blue grape of very high quality ripening a week to 10 days earlier than Concord. Very popular for both commercial planting and the home vineyard.

first place as an early market variety. The vine of Portland is particularly satisfactory as it is vigorous, productive, hardy and healthy.

SHERIDAN Black, larger bunch and berry; compact, skin not as tender as Concord and therefore a better shipper. Good quality. Dr. U. P. Hedrich, of New York Station, says: "Sheridan is probably the most valuable New Grape and is sent out with the expectation that it will supplement the Concord which it surpasses in vine and fruit characteristics in many regions."

FREDONIA

Promises to be the earliest good Black

NIAGARA
(White)

FOUR NEW GRAPES OF MERIT

These New Varieties (with the exception of Caco) are recent introductions of the N. Y. Experiment Station and all surpass the older standard kinds in both fruit and vine characteristics.

CACO (New Red Grape.) A variety of exceptional merit and should be in every collection planted, is the most beautiful of the hardy grapes, the bunches are large, well shouldered, color wine red with abundant bloom. Bunches are compact and of good size and form. Earlier than Concord and is sweet and palatable several weeks before it is fully ripe. The vine makes a very strong growth, hence is valuable for covering trellis or screens. Caco is beyond doubt one of the best of our native grapes.

PORTLAND (White.) The earliest of all grapes. Large bunch and berry; flesh sweet, juicy, and of fine flavor. A valuable early grape for home gardens, and bids fair to hold

American Cranberrybush

A New Fruit for Central and Northern U. S.

We are offering three selections of large fruited heavy yielding and highly desirable types of the American High Bush Cranberry, selected by the U. S. Dept. of Agriculture for their especially fine fruit characters as well as their ornamental value. This fruit is native to northern United States from Maine to North Dakota but produces well under cultivation as far south as the Ohio River and is not particular as to its soil requirements. It bears large, showy masses of white flowers in June followed by clusters of large, brilliant red fruit in late summer and fall. The fruit is very high in pectin, of a brilliant red color, and is used chiefly for making jelly eaten with meats. Highly ornamental and attractive to birds. The three selections were made in a plantation established by Mr. A. E. Morgan, president of Antioch College and now chairman of the Tennessee Valley Administration. The plants should be set about 8 x 8 feet apart and given clean cultivation.

WENTWORTH

Earliest, ready to be used for jelly early in August; bush large, spreading, productive, clusters large, drooping; berries large.

Price, American Cranberrybush — Heavy 2-3 ft. plants, 75c each; 3 for \$2.00. If by parcel post include 15c per plant for postage.

HAHS

Midseason; bushes vigorous, erect, very productive of attractive red berries; ripens in latter part of August and in September.

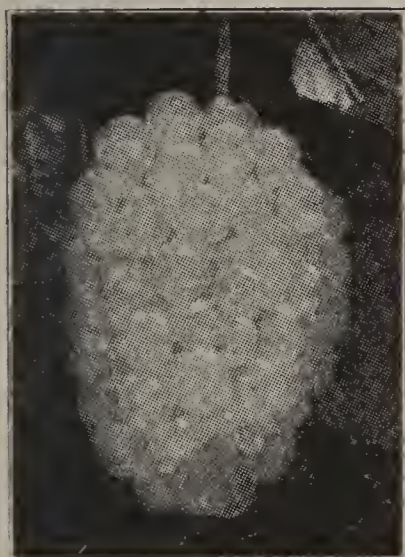

ANDREWS

Late, bushes vigorous, foliage dark green, clusters large, held erect by stiff stems; berries very large, very high in pectin; ripens in September.

NOVELTY FRUITS

ALL NOVELTY
FRUITS POSTPAID
UNLESS
OTHERWISE
NOTED

Different from ordinary fruits, and should be planted by everyone loving rare specimens. Plant in a small way as Novelties and they will surprise and well repay you.

BUFFALO BERRY

Fruit scarlet red, sprightly acid, and agreeable flavor, makes an excellent sauce or jelly served with meats. Its loads of fruit render it a showy object throughout the closing months of the year. Price, 35c each; 3 for \$1.00.

GUMI

(Cherry Eleagnus.) The long stemmed fruits are bright red and highly desirable eaten raw or made into jams and jellies. An attractive low shrub to 6 ft., ruggedly hardy and indifferent to neglect. Price, 35c each; 3 for \$1.00.

Japanese Wineberry

Growth similar to the Raspberries. Fruit in large clusters, wine colored. Price, 25c each; \$2.50 per dozen, postpaid.

THE LOGANBERRY

Mild, pleasant, vinous flavor, delicious, and peculiar to this berry alone. Not hardy north of the 40th parallel without protection. Price, 30c each; 3 for 75c.

Fall Bearing Cherry

"SWEET SEPTEMBER"

Plant Patent No. 94

\$1.50 each—see page 18

If by mail, add 15c per tree.

Boysenberry

Highest Quality of All Bramble Fruits
40c each—see page 12

\$1.00 Novelty Fruit Collection

We will send postpaid one plant each of the following varieties: STRAWBERRY-RASPBERRY, JAPANESE WINEBERRY, LOGANBERRY, CRYSTAL WHITE BLACK BERRY, HIMALAYA BERRY, YOUNGBERRY, AND GOLDEN QUEEN RASPBERRY, all for \$1.00; 3 each for \$2.00; 12 each for \$5.00.

Juneberry

Plants quite bushy and ornamental, with clusters of red berries becoming dark blue when ripe. Price, 30c each; 3 for 75c.

Persimmon

Native and Hardy

Price, 40c each; 3 for \$1.05.

Japanese—Tanenashi variety—as large as a tomato—sweet as sugar. Price, 75c each—3 for \$2.00. If by mail, add 15c per tree.

Hardy Nut Trees

PECANS—ENG. WALNUTS, etc.
See page 16.

Nanking Cherry

(Prunus Tomentosum)

Clusters of white bloom followed by delicious cherries on every branch—and do the birds like them? Price, 35c each; 3 for \$1.00.

"BELIEVE IT OR NOT" A True "White" Blackberry

Price, 20c Each

Golden Queen

THE YELLOW
RASPBERRY

Price, 20c Each

Blueberries

Price, \$1.60 Each
See page 9.

Strawberry- Raspberry

(TREE STRAWBERRY)

Bushes two feet high, covered with red berries, very productive and a distinct novelty in small fruits. Price, 20c each.

Dwarf Fruit Trees

Price: Dwarf Fruit Trees, 4 ft. size, \$1.00 each; \$9.00 per 10, except where noted.

SOLVE THE PROBLEM OF FRUIT GROWING IN SMALL AREAS

Very Ornamental for the Yard and Garden.

Dwarf Fruit Trees are more in demand now than ever before because they are so well adapted to planting in the yard, garden or wherever the space is limited. They come into bearing in two or three years after planting if well cared for and the fruit produced by these trees is same size and quality as produced by standard trees.

DWARF APPLE Perhaps no other fruit is attracting so much attention at the present time as Dwarf Apples, especially for garden and yard planting.

We can supply the following choice dwarf kinds: CORTLAND, DELICIOUS, McINTOSH, POUND SWEET, WEALTHY, TRANSPARENT, STAMENS, M. BLUSH, FALL PIPPIN.

ANOKA APPLE A new natural dwarf apple tree. Another one of Prof. Hansen's Hybrids and noteworthy for its beautiful red striped fruit and early bearing—often producing apples the year after planting. Anoka is a splendid apple to eat or cook.

DWARF PEAR

SECKEL—BARTLETT—DUCHESS—
FLEMISH BEAUTY

DWARF CHERRY

ENGLISH MORELLO

Large wine-colored fruits with red flesh and red juice. The variety is not on dwarf stock but is naturally a small tree.

Price, 4-5 ft. trees; 75c each; \$7.00 per 10.

OKA CHERRY A new plum-cherry creation of the Sand Cherry type, produced by Prof. Hansen, of South Dakota. Begins to bear on two-year trees. Trees are dwarf in growth and bear an abundance of fruit—immense round cherries, a full inch in diameter—dark red in color, purple juicy meat and wonderfully sweet.

Hardy Nut Trees

PERFECTLY HARDY IN OUR NORTHERN STATES—LARGE SIZE AND HEAVY YIELDING VARIETIES

These are budded and grafted varieties—the very finest—large meats, excellent flavor and have proven hardy to withstand our Northern climate. Please do not confuse them with the common seedling trees which are so often offered at a much lower price.

These are all well developed trees grown by the best nut specialist in the United States and will be shipped from our nut nurseries. Send your orders early.

APPLE TREES

LODI A LARGER, BETTER TRANSPARENT APPLE

Here is the ideal early apple. Introduced by the N. Y. Exp. Station and has proven highly satisfactory whenever planted. Ripens a few days later than Transparent but because of its good size may be picked even before Transparent. Color is clear waxen yellow, size is much larger, flesh firmer and skin somewhat thicker making it easier to handle without bruising. Same high cooking quality as Transparent. We are planting heavily of Lodi in our orchards this year.

Price, 10c per tree higher than other varieties listed below.

New Lodi Apple

The six-year-old tree from which this photo was taken produced 2 bushels apples all 2¼ in. and up. This limb produced 13 apples 2½ in. up on a space of 20 in.

• • • SCARFF'S NEW MIAMI • • •

DOUBLE SPORT OF STARK—COLOR AND QUALITY

Better Color—Finer Texture—Higher Quality. These combined with the other good characters of the common Stark will make "Miami" one of the leading winter apples for both home and commercial use. The fruiting trees which we have are identical to Stark—vigorous, thrifty and heavy producers. The fruit is above medium to large; color solid pinkish bronze to bright red and flesh is crisp, juicy, better quality and finer texture than Stark. **Excellent** for eating and culinary use. We have a limited supply of these new "Miami Red" trees and will book orders as long as supply lasts in both 1 and 2 yr. Trees for \$1.00 each; 10 for \$9.00.

TURLEY WINESAP A large dark red apple of very attractive appearance. Turley is a winesap seedling from the Orchard of the Indiana State Horticultural Society. It has unusual culinary qualities, excellent for eating and is a late keeper. Tree is a vigorous grower, well formed and an annual cropper. Growers who have Turley in their orchards prefer it to the Stamens primarily because of its greater productivity; better color, large size and freedom from cracking. We have planted heavily to Turley in our own young orchards and can highly recommend it to our customers.

RED ROME (Gallia Beauty) This Gallia is the best of the several Red Rome strains. A number of young trees of this

variety and also Turley in our own orchards came into bearing this year and I want to tell you their superiority over the older standard kinds was very marked. There is no difficulty in selling these beautiful large, solid, red apples. Gallia is identical in quality with Rome Beauty but, of course, solid red in color.

DOLGO CRAB Fruit fiery red and hangs on the tree long after ripe—making it exceedingly ornamental as well as valuable for making jellies. We can recommend it as the finest and most beautiful crab grown.

HYSLOP CRAB Best late fruiting crab.

SUMMER VARIETIES

Transparent, Lodi, Red Duchess, Wealthy, Maiden Blush, Summer Rambo.

WINTER VARIETIES

Grimes Golden, Jonathan, McIntosh, Rambo, Red Spy, Baldwin, Double Red Delicious, Cortland, Banana, Dr. Mathews, Milton.

LATE WINTER VARIETIES

Red Baldwin, Miami Red, Rome, Gallia Beauty, Double Red Stamens, Turley Winesap, York, Red Stark, Macoun.

PRICE APPLE TREES—Quantities for a Single Variety (except where otherwise noted)

	Each	10	25	100
4-5 ft.	75c	\$6.50	\$13.75	\$50.00
3-4 ft.	60c	5.00	11.25	40.00

Scarff's New Miami Red

SWEET SEPTEMBER

• • • New Fall Bearing Cherry • • •

Plant Pat. No. 94

Starts bearing second season after planting

Ripens September first—and hangs until the snow flies

SCARFF'S "SWEET SEPTEMBER" is the most sensational introduction of the year and it is the first Fall Bearing Cherry ever recorded in Horticulture. We are proud to offer such an unusual variety to our customers. The fruit is the size of a good Montmorency, striking red in color; quality is delicious for eating raw and a good canner. Hardier than the average Sweet Cherry and so far has been free from rot and curculio injury. The tree is a strong grower developing a well shaped top—very desirable for orchard planting and as an ornamental tree for the lawn. It comes in bearing at an early age often producing fruit the second year. Our supply is somewhat limited this year so we would advise that you order without delay. Price, strong 1 year trees, 3 to 5 ft., \$1.50 each. If by mail add 15c per tree for postage.

EARLY RICHMOND Dark red; medium size; very popular. A standard and time-tried variety. Early May market.

MONTMORENCY Larger than Early Richmond, about ten days later, and is probably the best and most paying variety in cultivation for market. Best for canning and general home use.

ENGLISH MORELLO The standard late sour cherry. Fruit large, handsome, rich, dark wine color, red flesh and red juice, and with pleasing aromatic flavor.

BLACK TARTARIAN (Sweet) The most dependable of the large dark red sweet cherries. Quality is excellent. Tree is thrifty and very productive.

STANDARD CHERRIES			
Prices, 4-5 ft. trees	Each	Per 10	Per 100
Sour	75c	\$6.50	\$60.00
Sweet	75c	7.00	70.00

ORANGE QUINCE

Strong trees for 85c each; \$7.50 per 10.

APRICOT

HARRIS HARDY APRICOT. The fruit is fully as large as the best Apricot grown in California, and so much better in quality as to make and hold a place in the market against the very best from California. Price, 75c each; \$7.00 per 10.

BING (Sweet) One of the best of the very large, and very dark red cherries of the Pacific Northwest. The fruits are almost unequaled in size, attractiveness and quality. Flesh dark red, firm, meaty and with purple juice.

WINDSOR (Sweet) This large dark red variety should be included as a pollinizer in all Sweet Cherry plantings. The fruits are firm, beautiful color, excellent quality and quite free from brown rot. The trees are thrifty, one of the hardiest and not particular to soil requirements. Windsor is one of the most profitable Sweet Cherries grown.

ROYAL ANNE (Sweet) This is the variety used by most of the commercial canneries, and for home use it is given preference over all other Sweet Cherries for canning and other culinary purposes. It is light in color and ranks first place by virtue of its large size, handsome appearance and high quality fruit.

OKA CHERRY The new big black sweet cherry from the South Dakota Fruit Breeding Farm, immense round cherries a full inch in diameter, grows on a tree so small that one can have them in the back yard. \$1.00 each.

QUETTA NECTARINE Hardy as a peach, a delicious sweet flavor, smooth skin and with striking red color. Our pickers call this the "Fuzzless Peach"—and do they like them. Price, 75c each; \$7.00 per 10.

Scarff's Delicious Plums

There is a greater interest in plums now than for many years and the reason is because there are so many new high quality varieties now available. There is no finer fruit to eat when picked dead ripe from the tree, and the housewife knows a hundred ways to cook them—from plum pudding down to preserves and jellies. We are offering an especially fine selection of varieties and can assure you that you can expect fine crops of excellent fruit from any one or all of them.

BRADSHAW Very large fruit; dark red; flesh inclined to yellowish-green.

DAMSON Everyone is familiar with the old-fashioned Damson plums and there is always a good demand for them.

REINE CLAUDE Best of the Green Gage type. Very large, greenish; fine flavor.

ITALIAN PRUNE A valuable plum of fair quality for dessert. Long, oval, purple with a thick blue bloom; flesh firm and pleasant, separating from the stone. September.

IMPERIAL EPINEUSE Is the highest quality of all the Old World plums. It is of the prune type, reddish purple, sweet, juicy and delicious flavor. Ripens late and escapes brown rot. This is the plum of plums for the garden.

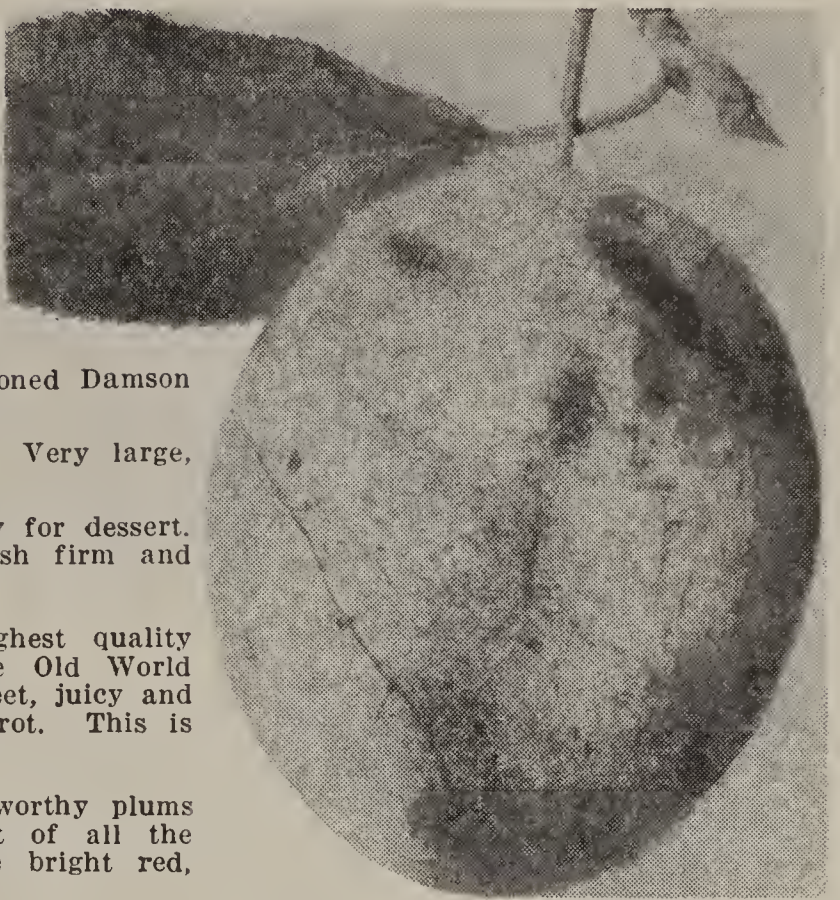

SANTA ROSA Is one of the new noteworthy plums and considered the best of all the Japanese varieties. The fruit is large, attractive bright red, yellow flesh and a very prolific bearer.

NEW SUPER HARDY PLUMS from the Northwest

The Minnesota Fruit Breeding Farms have introduced a number of beautiful selected **Native** and **Hybrid** Plums. They are worthy of general planting because of their extreme hardiness, productivity and bearing at a very early age, their striking appearance and the fact that they are less affected by rot. We are offering the Superior and Underwood varieties as the most desirable of all these introductions.

SUPERIOR Large heart shape, bright red, meaty and high quality. Ripens over a long period. Tree rapid growing and starts bearing three years from bud.

UNDERWOOD Very large, bright red and with an especially small pit. One of the very best in flavor and a tremendously heavy producer.

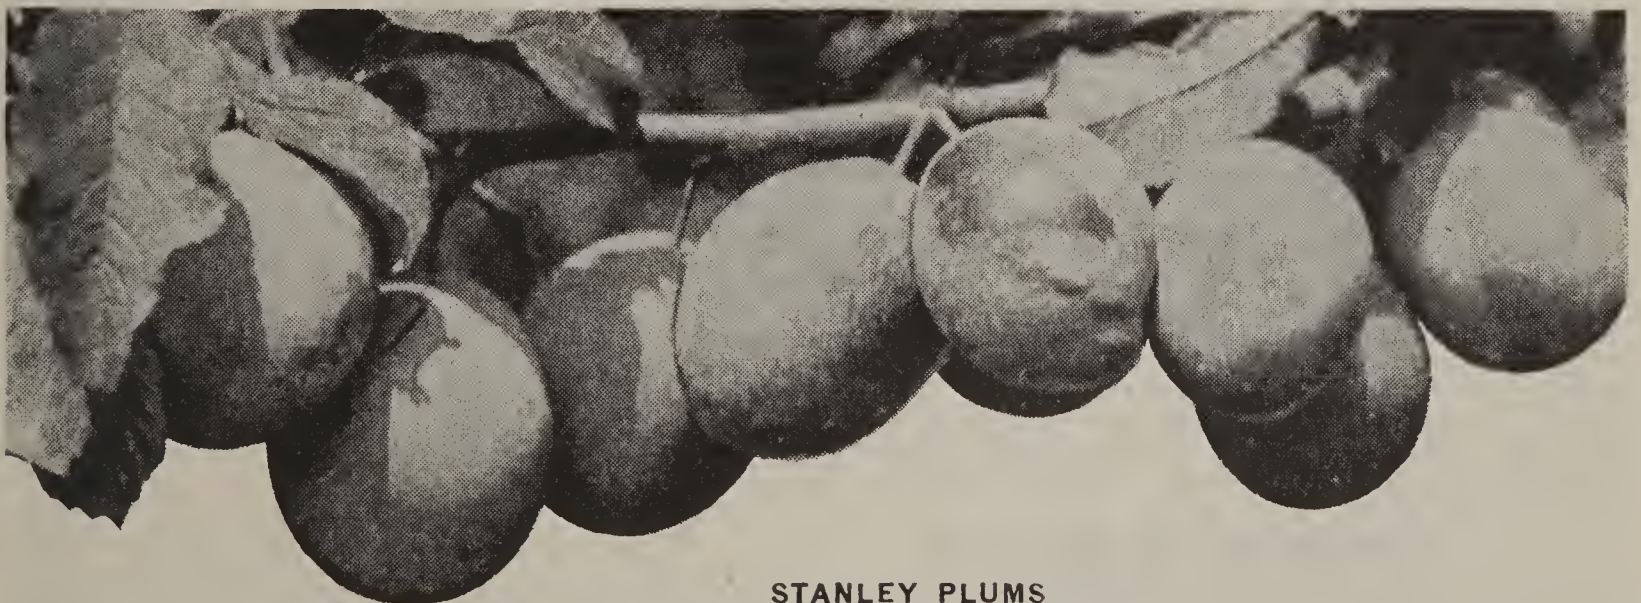

Stanley—Hall—Albion

These varieties have shown up the best of 300 varieties on test at New York Experiment Station. They are outstanding plums of excellent qualities and deserve a place in every orchard.

STANLEY Comes into bearing very early. It is a heavy producer, adapted to a wide range of soils and has been favorably reported from all parts of America. It is a fine blue plum of medium size and high quality.

HALL Is a very large, handsome purplish blue plum of the Duke type and ripening quite late in the season.

ALBION Is also a very large, beautiful dark purplish blue variety and is considered the best late European plum.

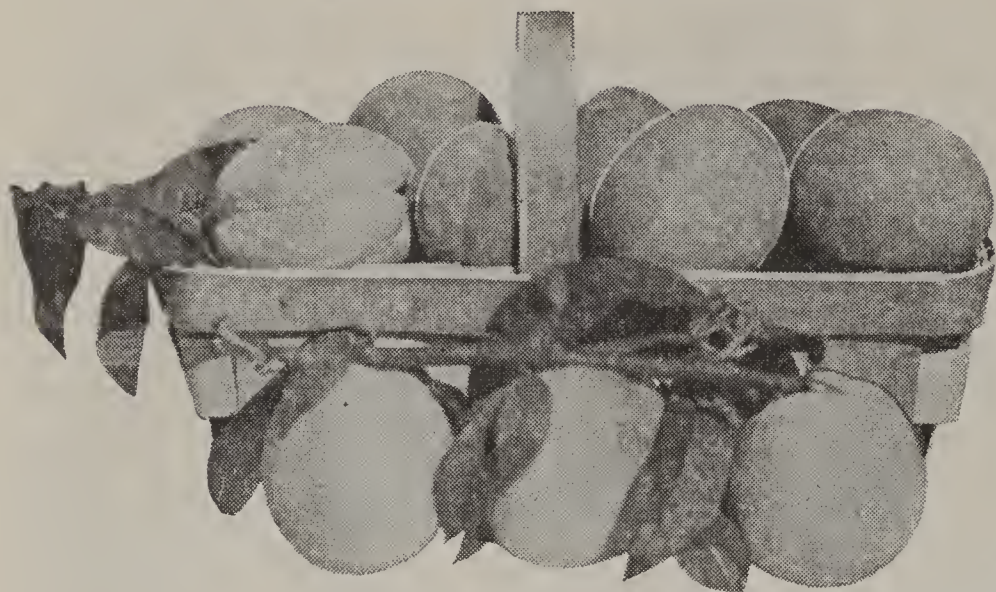

STANLEY PLUMS

We are listing only the best of the Plums
You can plant any or all of these varieties and get heavy crops of excellent fruit

PRICE OF PLUM TREES 4-5 FT.

... PEACHES ...

The New Kette Peach

NEW KETTE PEACH

UNIFORMLY LARGE SIZE—HIGH QUALITY—FINE TEXTURE

These are just a few of the good characteristics of the New Kette Peach. The tree is a very thrifty grower and of the round spready type. Fruit is large, round, slightly oblong, golden yellow, partly overspread and mottled with light red and has very little pubescence or fuzz. Flesh lemon yellow, fine grained. The Kette is exceptionally fine for canning. Ripens three to five days later than the Elberta, extending the season of that variety.

GOLDEN JUBILEE

A large, yellow peach of the Elberta type, very recently became the most popular early yellow peach. It ripens three weeks earlier than Elberta and is of better quality. The skin is yellow blushed with red; flesh yellow, juicy, tender, sweet, freestone.

VEDETTE—VALIANT

These two outstanding varieties are of Canadian origin—seedlings of Elberta but both are a thousand times better in quality. Both are very early, ripening 2 to 3 weeks ahead of Elberta—a decided advantage in these days of the Oriental Peach Moth.

STANDARD PEACHES

CHAMPION—The standard midseason white peach.

ELBERTA—The standard midseason yellow peach.

HALE HAVEN—A new high quality medium early variety from Michigan.

HOPE FARM—A new hardy variety of white freestone from the east.

J. H. HALE—Very large yellow freestone. A good canning peach.

MIKADO—One of the earliest of the good yellow peaches. New and tends to cling.

ROCHESTER—One of the hardiest yellow peaches. Early. Medium size.

SOUTH HAVEN—Another early hardy variety. Very high quality and good canner.

SHIPPERS BIG RED—More desirable than Elberta in every respect—better color, quality, yield and tree characters. A mighty fine peach.

WILMA—Best late peach of Elberta type.

CUMBERLAND Here is a beautiful new hardy peach of high quality that will produce a crop when most other varieties are killed by spring frosts. It is a large early white peach ripening with Carmon and much better color and quality. Tree is thrifty and comes into bearing early. In 1934, following a most severe winter and heavy spring frosts, Cumberland was one of the very, very few varieties to come through with a full crop of fine fruit at the Ohio Experiment Station.

PRICES—PEACH AND PEAR TREES

		By Express	
	Each	10	100
Peach 4-5 ft.....	60c	\$5.00	\$40.00
Pear (Standard) 4-5 ft.....	75c	7.00	65.00
Pear Cayuga-Gorham-Pulteney	80c	7.50	70.00

A NEW RACE OF PEARS

FROM THE N. Y. AGRICULTURAL EXPERIMENT STATION

These three new Pears—Cayuga, Gorham, and Pulteney embody high quality, size, attractive appearance and good tree characters. Their characteristics meet requirements much desired in pear varieties—and they are truly IN LINE WITH PROGRESS.

CAYUGA These pears average as large as those of Bartlett but with the delectable flavor, shape, and color of Seckel—its parent. The tree characters seem all that could be desired.

GORHAM-PULTENEY Both of these new pears are of the Bartlett type, with the same high quality and attractive appearance. Gorham ripens two weeks later than Bartlett and keeps a month longer. Flavor is sweet and with a pleasing aroma. Flesh is white, tender, buttery, and juicy—a combination which, with the rich flavor and spicy aroma makes this one of the very best flavored pears of its season. Canners find it superior to Bartlett. Pulteney ripens about four weeks later than Bartlett thus extending the season of delicious high quality and attractive pears well into the winter season. These are three outstanding pears and you will want them for their high quality, productiveness and for profit. They certainly provide a long season of delicious fruit for the home or market.

Standard Pears

BARTLETT The standard of excellence in pear varieties. One of the most popular and should be included in all plantings.

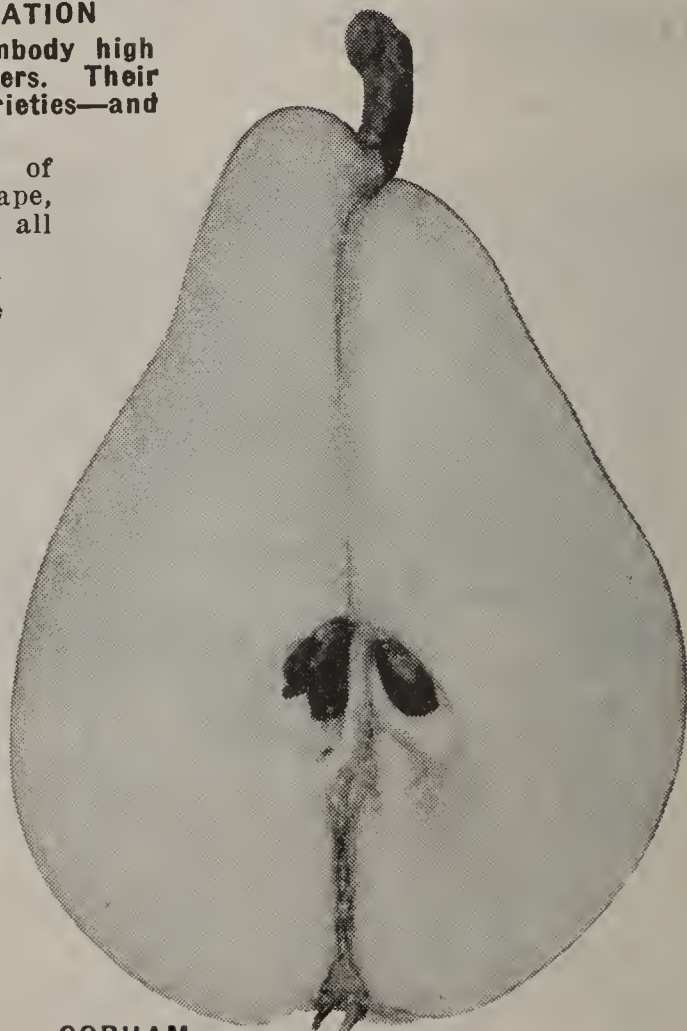

BOSC This is one of the highest in quality of all pears. Fruit large rich yellow overspread with cinnamon russet. Flesh tender, melting and juicy. Ripens late October.

DUCHESS Very large, buttery—a fine canner.

KIEFFER. One of the most dependable winter pears. Bears very young. Fruit large and keeps until Christmas.

SECKEL Best for pickling; highest quality, medium size.

WILLARD is a winter pear of high quality, large size, and of typically rough Bartlett shape.

GORHAM
A Blight Resistant Pear to Follow Bartlett

ORNAMENTAL FRUITS

Trees and shrubs which produce a wealth of fruit—ornamental fruits of brilliant colors which help to enliven the winter landscape—and those edible fruits which lend an added interest and a distinct satisfaction to the palate.

ORNAMENTALS

More complete descriptions on following pages of this Catalog.

BARBERRIES—Red and green varieties. Conspicuous red berries persistent throughout the winter. See page 22 for prices.

BITTERSWEET VINE—Familiar to all. 35c each, 3 for \$1.00.

BUSH HONEYSUCKLES — MORROWS—TARTARIAN—35c each, 3 for \$1.00. These are the first of shrubs to ripen their fruits in the summer and the berries are borne in such profusion as to weigh down the arching branches.

FIRETHORN—50c each—Large size 75c by express. Evergreen Shrub—Clusters of orange fruits.

MAHONIA—(Holly Leafed) Evergreen—Thrives in shade. Yellow bloom, clusters of blue berries. Price, each, 18 in. plants, 75c B. & B. by express.

MT. ASH—A small tree—Orange color fruits similar to Firethorn. 6-8 ft. trees. \$1.00 by express.

PRIVETS—Regels and Ibota. See page 27. Clusters of turquoise blue berries which hold until spring.

RHAMNUS FRAGULA (Buckthorn)—Handsome shrub. Shiny foliage. Black fruits. 30c each; 3 for 80c.

RHODOTYPUS (Jetbead)—Jet black berries. 35c each; 3 for \$1.00.

Edible Fruits

AMERICAN CRANBERRY BUSH Handsome tall shrub, very striking red berries. Valuable for sauce, etc. See page 15.

BUFFALO BERRIES Scarlet red fruits, agreeable flavor, excellent for jellies. 35c each.

CHERRY ELEAGNUS Attractive low shrub. Long stemmed red fruits, desirable eaten raw or in jam. 35c each.

ELDERBERRIES The fruit makes delicious pies and wine. Fine ornamental for background planting. 25c each.

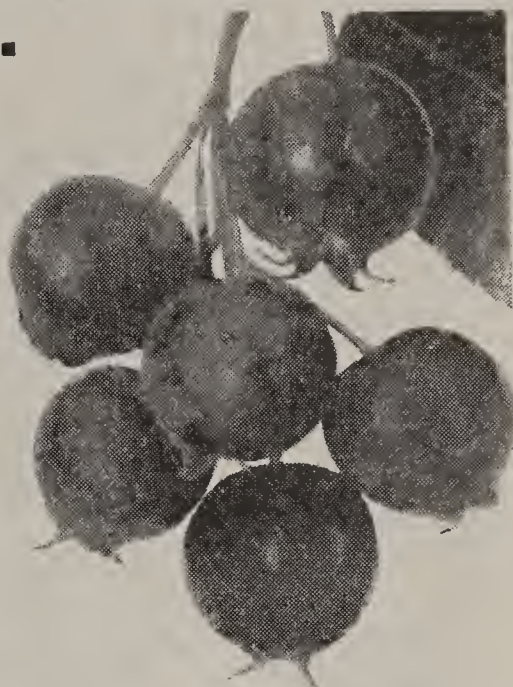

GRAPES As vines for trellis or fence, ornamental and easy to grow. See page 14 for our select varieties.

MULBERRIES New American variety. Heavy fruiting and hardy 5-ft. trees. 75c each.

NANKING CHERRY (*Prunus Tomentosum*) Something new in an ornamental fruiting shrub. You will like these fruits and so will the birds. 35c each.

NEW FALL BEARING CHERRY—A very ornamental tree, and you will be proud to show your friends these delicious fruits in late summer. \$1.50 each.

PERSIMMONS—See first inside cover page.

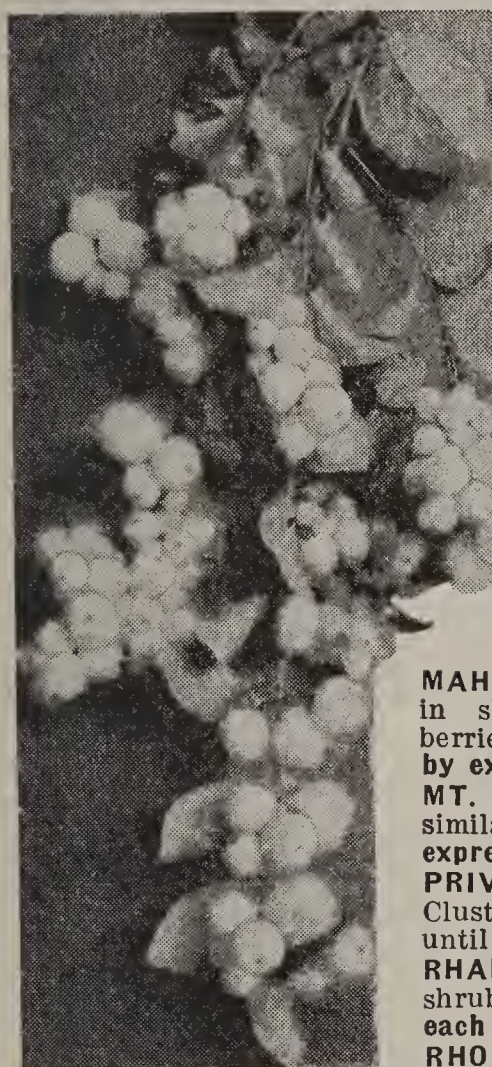

Juneberries Blueberries

Distinctly ornamental shrubs—glossy leaves—brilliant fall colors; striking blue fruits—delicious to eat and for pies. See pages 9 and 15.

Dolgo Crab

The brilliant red fruits of this new Crabapple are exceedingly ornamental and they make as beautiful jelly as you have ever seen. Price, 4-5 ft. trees, 75c each.

SNOWBERRIES — The showiest and heaviest fruiting of all the ornamental shrubs. Three varieties—red, the beautiful new pink Chenaulti and the large snowy white. Easy to grow in sun or shade. 35c each; 3 for \$1.00.

CURRENTS— GOOSEBERRIES

These develop into as fine shrubs or hedge plants as any of the ornamental shrubs and the fruits are both ornamental and useful. Arsenate of lead will keep the worms off the leaves. We are offering several new large fruited varieties fully described on page 13 of this catalog.

Dwarf Fruit and Hardy Nut Trees

Practical and ornamental. The Dwarf trees require much less space than standard trees and start bearing at an early age. The selected Hardy Nuts are a distinct luxury and the trees are very desirable for their shade. See page 16 for more complete descriptions.

ORNAMENTAL SHRUBS

for Beautifying the Home

Price — All Shrubs on this page strong 2 yr. 18-24 in. plants, 30c each; 4 for \$1.00, postpaid. Extra heavy 2-3 ft. plants, 35c each; 3 for \$1.00, by express, not prepaid — except where otherwise noted.

Nothing will add more to the value and beauty of your home than a few of our beautiful flowering shrubs planted around the house and in the lawn. We are recommending only the ironclad shrubs which are perfectly hardy, the varieties which have proven their worth and bloom profusely under a wide range of conditions.

**PHILADELPHUS
VIRGINALIS**

Beautiful, large, semi-double,
sweet-scented syringa

ALTHEA ROSE OF SHARON. Strong, erect-growing shrub. Large showy flowers in late summer. Assorted colors.
BARBERRY One of the best foundation and hedge plants. Compact growth.

PRICES ON SCARFF'S BEAUTIFUL BARBERRY

BUTTERFLY BUSH Long graceful spikes of lilac blue flowers the first season planted.

CALYCANTHUS Sweet scented shrub—chocolate colored flowers with spicy odor.

CORNELIAN CHERRY Tall shrub—yellow flowers in early spring, cherry-like fruits, edible.

DEUTZIA The Pride of Rochester variety is a mass of pinkish white blooms in early spring.

DOGWOOD Red and yellow twig varieties—both strong growers. Beautiful for winter effect.

ELEAGNUS LONGIPES Tall shrub—fragrant yellow flowers — long stemmed oranged fruits, palatable and decorative.

FLOWERING ALMOND A mass of small rose-like blossoms in very early spring. Price, 40c each.

FORSYTHIAS The goldenbells with their arching branches of golden yellow flowers are first to bloom in the spring.

—SPECTABILIS—The most profuse bloomer, upright.
—SUSPENS—The true weeping goldenbell.

HYDRANGEAS These large flowering shrubs are excellent for either lawn or foundation planting.

—ARBORESCENS. Large white flowers and everblooming.

—OAK LEAF. One of the best shrubs for shade—white flowers.

—PANICULATA GR. The large pink hydrangea. May be trimmed tree form.

HONEYSUCKLES Most valuable tall growing shrubs. In beautiful foliage, flowers and attractive fruits.

—TARTARIAN. Pink flowers, orange fruits—upright.

—MORROWS. Yellow flowers, red fruits—oval shape.

—MAXIMOWECZI. New deep red flowers and plenty of red berries.

JAPAN FLOWERING QUINCE The scarlet red flowers appear before the leaves and are followed by yellow quince-like fruits.

KERRIA JAP The double Globe Flower, ever-blooming yellow rose-like flower and bright green branches in winter.

LILACS The old-fashioned white and purple lilacs are not surpassed in beauty and fragrance.

—EVERBLOOMING LILAC. An outstanding novelty from China. Price, 50c each.

PHILADELPHUS The mock oranges are most noted for their waxy white delightfully fragrant orange-like blossom.

—GOLDEN. Golden yellow foliage, dwarf in growth. Price, 50c each.

—VIRGINALIS. Best of the new large flowering syringas.

PRUNUS TOMENTOSUM NANKING CHERRY.

Clusters of white bloom followed by the delicious cherries on every branch—and do the birds like them?

REGELS PRIVET One of the finest foliage shrubs for ornamental planting. White bloom. Masses of blue-blackberries.

ROSA ACACIA Pink Flowering Locust in bush form. Clusters of most fragrant blossoms.

RHAMNUS FRANGULA Glossy Buck-thorn, yellow in autumn. Red, purple and black berries.

HOLLY LEAF MAHONIA The Mahonia produces clusters of yellow flowers and blue berries and is one of the very best evergreen shrubs for planting in the shade, in the border, and around porch or foundation. Price, 18-24 in. plants, 75c each, by express.

HOLLY LEAF MAHONIA

Scarff's Beautiful Spireas

Price — All Shrubs on this page, strong 2 yr. 18-24 in. plants, 30c each; 4 for \$1.00, postpaid. Extra heavy 2-3 ft. plants, 35c each; 3 for \$1.00, by express, not prepaid — except where otherwise noted.

SPIREA ANTHONY WATERER Produces a red bloom about midsummer and continues to bloom for several weeks. It is extensively used in foundation plantings as it only attains a height of about 3 feet. Foliage buds out in very bright green early in the spring and may be kept trimmed down to almost any height. 2-yr. plants, 12-15 in. and 15-18 in.

SPIREA FROBELI Similar to the Anthony Waterer, stronger growth. Flowers pink.

SPIREA BILLARDI (RED AND WHITE.) This is a beautiful upright growing Spirea reaching a height of 5-6 ft. that is good to plant back of the Anthony Waterer or Thunbergi.

SPIREA THUNBERGI Has beautiful feathery foliage and is a very graceful low-growing shrub, excellent for foundation and border planting. Attains a height of three feet and produces a profusion of miniature white flowers very early in the spring, often while the snow is still on the ground.

KOREAN SPIREA This handsome new shrub was discovered in the mountains of northern Korea, by Mr. E. H. Wilson, and has been enthusiastically admired by all who have seen it since its introduction to America. It is the best of all the Spireas in commerce.

It is a splendid, dome-shaped bush, covered in its season with large, rounded clusters of snowy flowers marked with darker eyes.

Blooms two weeks later than the familiar Spirea Van Houttei.

Spirea Van Houttei

Plant at least a half dozen of these beautiful white flowering shrubs about the lawn, and they will repay you a hundred fold.

In making a house and lawn attractive there is no better shrub than Spirea Van Houttei. It is a plant growing about five feet high, with delicate leaves and clusters of white flowers. Price for large 2-3 ft. plants, 25c each; 5 for \$1.00; by express.

RED LEAVED JAPANESE MAPLE The blood red color of these shrubs in early spring makes it one of the outstanding shrubs—or small trees—for accent planting in the lawn and border. The Oshio-Beni variety which we are offering is one of the best in both color and hardiness. Price, 18 in. plants, each \$1.50 by express.

KOREAN SPIREA

RHODOTYPUS (WHITE KERRIA.) White Kerria flowers and hardy black berries. Medium height.

SMOKE BUSH Purple Fringe. The mist-like appearance of this shrub is most fascinating. Price, 40c each; 3 for \$1.15.

SNOWBERRIES

Among the finest of the fruiting shrubs. Thrive in sun or shade.

—**PINK**—This new "Chenaulti" variety is outstanding for its graceful branching and beautiful foliage.

—**RED**—(Indian Currant) Branches weighted down with ropes of red berries.

—**WHITE**—Largest fruiting of all and an excellent shrub.

TAMARIX Tall shrub, fine foliage, general appearance resembling asparagus. Mass of Lilac flowers in May.

VIBURNUM OPULUS (High Bush Cranberry). Flat clusters of white flowers, later bending with clusters of red cranberry-like fruits.

—**OPULUS STERILIS** — Common Snowball and well known to all.

—**TOMENTOSUM**—Double file Viburnum—one of the most beautiful all-season shrubs. White flowers. Blue-black berries and fine autumn color.

WEIGELA EVE RATHKE — Flowers deep carmine red. Blooms profusely in spring and again in autumn.

—**ROSEA**—Flowers deep pink in early June.

WILLOWS The large **FRENCH PUSSY WILLOWS** come as a herald of springtime.

New, Rare Varieties of Shrubs

BEAUTY BUSH

(Kolkwitzia Amabilis)

A New Flowering Shrub from China

Mr. E. H. Wilson, former explorer and keeper of the Arnold Arboretum, describes it as follows:

"Of the many valuable hardy shrubs which our gardens here received from the Orient, none is more lovely than *Kolkwitzia Amabilis*. Related to the weigelas and abelias, this new plant exceeds them in hardiness and in beauty. The principal stems are erect and the lateral ones arching, giving the plant a compact habit, and in early June its sprays of abelia-like blossoms transform it into a fountain of pink loveliness. It is a sun-loving plant and needs loam and good drainage.

This New Beauty Bush is rare and beautiful—Order early. Price, heavy plants, 40c each; 3 for \$1.10, postpaid.

ARONIAS Outstanding because of their brilliant autumn foliage and most decorative fruits. We have both the red and black fruited varieties. Price, 45c each; 3 for \$1.25, postpaid.

BUTTERFLY "ISLE de FRANCE" This delightful new Butterfly bush is the hardiest of them all and the long spikes of brilliant colored lilac purple flowers, attractive to butterflies, are produced throughout the late summer. Price, 35c each; 3 for \$1.00, postpaid.

WITCH HAZEL (*Hamamelis Vernalis*) Winter Flowering Witch Hazel. Great masses of orange and yellow bloom in January and February. Hardy, sweetly fragrant and an excellent new shrub for the border planting that attains a height of 6 feet. Price, strong 24-in. plants, 40c each; 3 for \$1.00, postpaid.

NEW RED BUSH HONEYSUCKLE (*L. Maximowiczii* Sac.) Red fruits and red foliage as it first appears in the spring. A well rounded shrub and is going to prove to be one of the best of the Bush honeysuckles. Price, 35c each; 3 for \$1.00, postpaid.

KOLKWITZIA AMABILIS
Beauty Bush

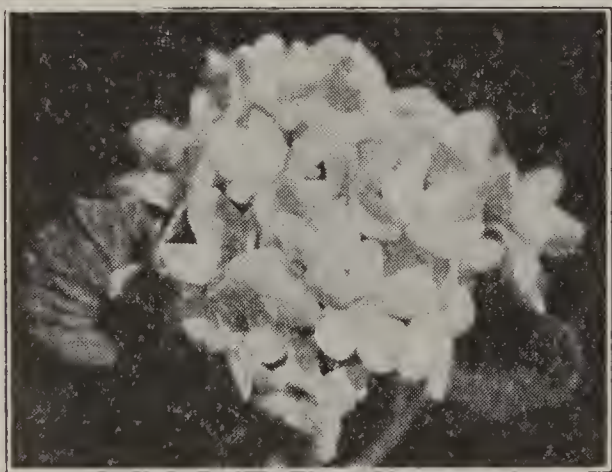

TRUEHEDGE COLUMNBERRY

The New Ready Made hedge plant. U. S. Patent No. 110. See page 27 for more complete description.

KOREAN SPIREA One of the most attractive of all spireas. Blooms one week after the common White Spirea V. H. and the bushes are covered with clusters of creamy white flowers. See illustration page 23. Price, 35c each; 3 for \$1.00, postpaid.

EVERBLOOMING LILAC

(*Syringa Microphylla*) A rare new shrub introduced from China by the Arnold Arboretum. A mass of lilac pink blossoms in early spring and it continues to bloom all through the summer—a true Everblooming Lilac and a good shrub for the lawn and border planting. Price, 18 in. plants, 50c each; 3 for \$1.25, postpaid.

PINK KOREAN SNOWBALL
(Fragrant Viburnum)

PINK KOREAN SNOWBALL

(*Viburnum Carlesii*.) Sometimes called the Mayflower Viburnum as it resembles the Mayflower in fragrance and blossom. One of the outstanding New Varieties of recent introduction. Blooms profusely in early spring and flowers are pink in color and heavy laden with spicy fragrance. Price, strong 2 ft. plants, \$1.00 each; 3 for \$2.50, postpaid.

LELAND'S FIRETHORN

FIRETHORN (*Pyracantha Lelandi*) An evergreen shrub with small dark green leaves, compact habit of growth, much branched. White flowers in spring followed by large clusters of bright orange scarlet berries. One of the most satisfactory shrubs to use. Must be planted in early spring or late fall. Price, 18-24 in. plants, 60c each; 3 for \$1.50, by express.

SILVER LACE VINE A charming new fast growing climber. See page 32.

NEW AND RARE TREES

Japanese Flowering Cherries

JAPANESE WEEPING CHERRY

The lovely planting of these trees along the Potomac River Drive at Washington, D. C., are the most notable collection of Japanese Cherries. The fame of these cherries has spread all over the U. S., and as they are hardy everywhere they should be largely planted.

KANZAN Double Flowering pink to old rose blossoms. One of the loveliest of the flowering cherries. Price, 5-ft. trees, \$1.35 each.

THE ROSEBUD "Weeping Cherry" excellent for refined lawns with its drooping branches, thickly studded with light pink bloom. Price, 5-ft. trees, \$2.50 each.

GOLDEN RAIN TREE

(Koelreuteria Paniculata)

A rare tree reaching height of 25 to 30 feet, very showy in July when spangled with foot long clusters of golden yellow flowers and in autumn when foliage turns to crimson and gold. Price, 4-ft. trees, 75c each; 3 for \$2.00.

GLOBE LOCUST (Umbrella Locust) A beautiful compact Globe headed tree, highly desirable for street or lawn planting. The trees are thrifty, hardy and free from insects and diseases. Symmetrical heads on 5 1/2 foot stems. Price, \$1.75 each; 3 for \$5.00.

PINK FLOWERING LOCUST (Rose Acacia) This is the moss pink locust top budded on to 5 foot standards. An excellent low growing lawn tree producing many clusters of very fragrant, delicate pink blossoms. You will certainly want one or more of these New Pink Flowering Locusts. Price, \$2.00 each; 3 for \$5.50. Bush type Rose Acacia, 35c each.

JAPANESE PERSIMMON (Tane-Nashi) The Japanese persimmons are much superior to our native forms in size and delicious quality of the fruit. The "Tane-Nashi" is the hardiest of all the Jap varieties and we offer it to you this year for the first time. Not entirely hardy north of Columbus. Price, 4 ft. trees, 75c each; 3 for \$2.00.

MAGNOLIA SOULANGEANA

Producing the large cup-shaped, white and rosy violet flowers 3 to 5 inches across, in the spring before the leaves unfurl. This variety is the hardiest and most adapted to northern conditions. Price, 1 yr., 2-3 ft. plants, B. & B., \$1.25 each; 3 for \$3.25, postpaid.

NATIVE RED BUD A small tree of refined type, most desirable for planting in lawn, or border. The tree is a mass of color in early spring before the leaves appear. Its beauty is enhanced when planted with White Flowering Dogwood. Price, 5-6 ft. trees, 75c each; 3 for \$2.00.

DOGWOOD Most beautiful of our native woodland trees. Flowers in clusters before the leaves in the spring, followed in the fall by numerous red berries and autumn color foliage is quite brilliant. Fine specimen trees for the lawn.

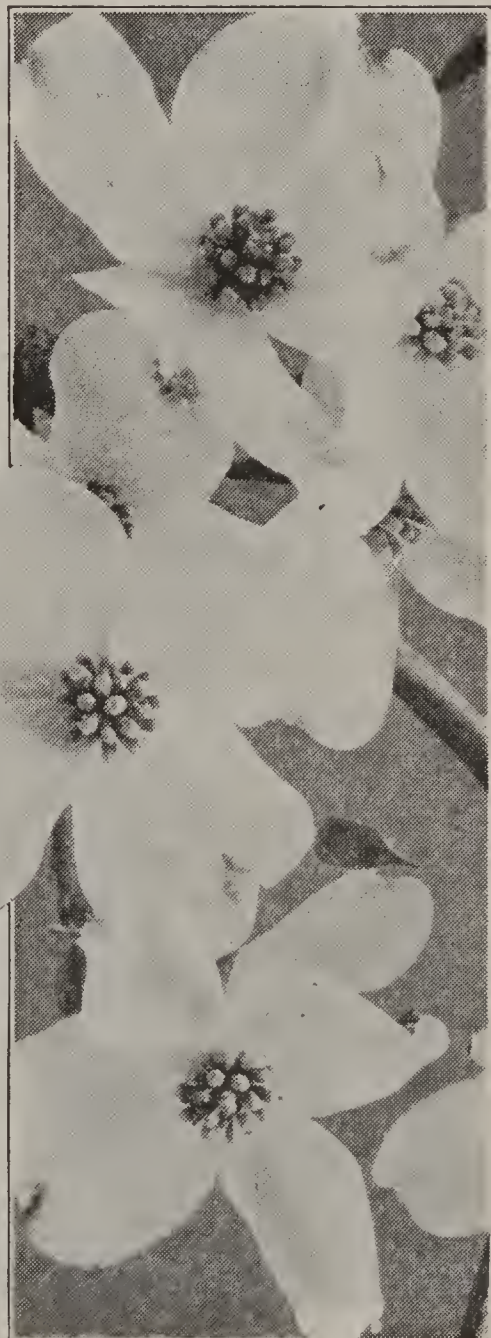

WHITE FLOWERING—4 ft. trees—\$1.50 each.

PINK FLOWERING—4 ft. trees—\$2.00 each.

GLOBE MAPLE Formal globe shaped heads on 6 ft. trunk. A fine tree. \$3.00 each.

RED LEAVED MAPLE (Schwedleri) Growth similar to Norway except that leaves are red in color in springtime. A very desirable lawn and street tree. Price, 8-9 ft., \$2.00 each.

PRUNUS CISTENA A NEW PURPLE LEAF PLUM. Finest of the Purple Leaf Plums. Shows more red in the colored leaves, lower growth and more compact than the common variety. Recently introduced from Dakota. General effect in the sunlight is a bright red. Price, strong plants, 40c each; 3 for \$1.00.

PINK FLOWERING DOGWOOD

ALL TREES ON THIS PAGE ARE PRICED BY EXPRESS NOT PREPAID

ORNAMENTAL TREES

NORWAY MAPLE The Norway Maple for the lawn and street planting has perhaps no equal. It is not a rapid grower, but it makes a compact and symmetrical top with spreading branches giving the finest of shade and protection from the sun and wind. A universal favorite among shade trees. Price, good 8 to 10 ft. trees, \$1.50 each; 10 to 12 ft. \$2.50.

Catalpa Bungei Trees

Iboia Privet Hedge

SCHWEDLERI MAPLE

(Red Leaved Maple) Very similar to the Norway variety except the leaves are red when they come out in the spring and later in the summer change to purplish green color. A very desirable lawn tree and our stock is selected to good color. Price, 8 to 9 ft. trees, \$2.00 each; 3 for \$5.00.

GLOBE MAPLE We have a very few of this very new and beautiful tree. Strong heads on 6 ft. standards. Price, \$3.00 each.

BECHTEL'S CRAB

Most beautiful flowering crab. Large, double, pink blossoms resemble small roses and cover the tree in early spring, remaining a long time. Green leaves attractive throughout the summer. Grows 8 to 10 feet tall. Price, 3 to 4 ft. trees, 75c each; 3 for \$2.00.

DOLGO CRAB A true crab apple producing heavy crops of highest quality fruits for jellies, etc. Blossom pinkish white but its great ornamental value lies in the abundance of fiery red fruits which hang on the tree long after ripe. This is a new variety from the northwest and it bids for highest place as a dual purpose crab apple. Price, 5 ft. trees, 75c each; 3 for \$2.00.

All trees on this page are priced by express not prepaid.

Chinese Magnolia (Soulangeana)
(See page 25)

MOUNTAIN ASH (European) — A splendid small tree, distinctly beautiful and attractive. In late summer and far into the winter its greatest beauty and effectiveness center in the large dense fruit clusters which are a brilliant orange red. Price, 6-8 ft., \$1.25 each; 3 for \$3.00.

LOMBARDY POPLAR

Upright in growth, valuable for planting along driveways, boundary lines, in the background and as a screen. It is a very rapid growing tree and will furnish almost immediate effect. Fine trees, 6 to 8 feet, price 50c, each; 3 for \$1.25.

CHINESE ELM (Ulmus Pumila.) A native of China. A noble, rapid-growing tree. Forming a very dense head, with smaller, darker leaves than the American Elm. Leaves stay on the tree much longer in the autumn. Price, 8 to 10 ft., \$1.25 each; 3 for \$3.45. One-year whips, 3 to 4 ft., 35c each.

A Good Shrubby Planting—Lombardy Poplar Trees in Background. Hydrangea Arb. Flowered Hedge at Border of Lawn.

Beautiful Hedge Plants

Truehedge Columnberry

U. S. Plant Patent No. 110

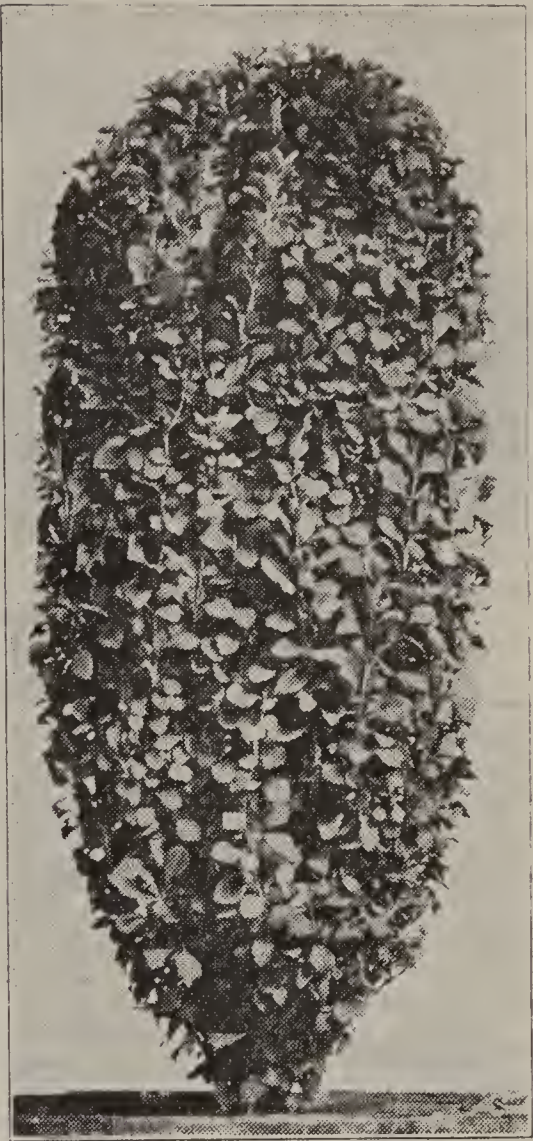

Sensational New Hedge Plant

Foliage and Growth Similar
to the Boxwood

The quick, erect, compact growth of the Columnberry results in a "self-made hedge." It retains its neat, well groomed appearance with very little trimming. The leaves are larger, thicker and of a much deeper, glossier, healthier shade of green than common Japanese Barberry, taking on a rich deep red coloring in the fall. Its winter beauty lies in the numerous red berries produced profusely and which hang on the bushes until spring.

Single plants of the Columnberry may be sheared to specimen pyramids, ovals, espallier and tree shapes. This is truly a remarkable new plant both as an individual shrub and for hedging.

BARBERRY

Set Plants One Foot Apart for Hedge

The Barberry forms a most beautiful and conspicuous low growing hedge, and one that is especially suited for making boundary lines. Equally as desirable for foundation planting as in a hedge.

RED BARBERRY

DARK RED IN MIDSUMMER
AND FIERY RED IN AUTUMN

This beautiful New Red Leaved Japanese Barberry forms a most attractive hedge. The rich lustrous bronze red foliage throughout the summer changes in the fall to vivid orange scarlet and red shades, more brilliant than any other shrub and is followed by an abundance of red berries that remain on the plant throughout the winter. Plant it in full exposure to the sun to bring out its brilliant coloring.

PRIVET HEDGE

The Privet is a most desirable hedge plant for the boundary of the lawn, along drives or to form an enclosure of any kind. The deep green glossy foliage hangs late in the fall and often well into the winter. The hedge adds a touch of privacy and formality to your home. The Privets are thrifty growers and will make a good thick hedge the first year after planting. They can be clipped to any shape. Plant the Privets 6 inches apart for a good thick single row hedge.

A WELL KEPT PRIVET HEDGE

EVERGREENS for All Winter Beauty

These are the plants that will give your planting a striking green effect throughout the winter. The varieties we are offering are the hardy types that are good compact plants and are easy to transplant. Plant them in front of your porches, in foundation or group plantings. They will double the beauty of your property.

American Arbor Vitae

Blue Spruce

Globe Arbor Vitae

Golden Biota

Biota Compact

ARBOR VITAE

—**American** Strong, graceful habit of growth. Can be kept trimmed to any desired shape. Useful for screens and high hedges also for large group plantings. Price, 2-ft. plants, 50c; 3-ft., 75c; 4-ft., \$1.00; 5-ft., \$1.50; 6-ft., \$2.00; 7-ft., \$3.50.

—**American Golden** (George Peabody) Similar to American except the leaves are beautiful bright golden color in sharp contrast to the deep green of other varieties. Price, 2-3 ft., \$1.25 each; 3-4 ft., \$1.50 each.

—**Globe** A round, dense, dark green form of Arbor Vitae of dwarf habit and excellent for low foundation plantings. Price, beautiful 15-in. plants, 60c; 18-in. specimens, 90c; 24-in. \$1.00.

—**Pyramid** A densely branched variety forming a perfect column; holds its shape without trimming or pruning. Price, 2-ft., 90c; 3-ft., \$1.25; 4-ft., \$1.75; 5-ft., \$2.50.

JUNIPERS

—**Burki** (Blue Juniper) This is one of the best types of the Blue Juniper. Upright broadly columnar type of growth. It may be kept sheared to compactness or allowed to grow informally. The striking blue foliage is handsome and always attractive—one of the choicest of all Junipers. Price, 3 ft. plants, \$1.50 each.

—**Cannarti** —A true Aristocrat is this handsome cedar, columnar in outline and a very deep green foliage. Price, 3-ft. tree, \$1.50 each.

—**Excelsa Stricta** (Spiny Greek Juniper) These are handsome specimen plants with a peculiar blue green shade of color continuing fresh color throughout the winter. Dwarf, very dense cone shaped; slow growing and useful in foundation plantings. Price, 15-18 in., 90c; 18-24 in., \$1.00.

—**Globe** This is a true Globe type of red cedar. Dwarf in growth and a wonderful fine plant for foundation plantings. This variety, like all the Junipers, holds its color well through the winter and is little affected by dogs. We have only a few specimen plants and these are 2 to 2½ ft. in height and diameter. Price, \$2.00 each.

—**Irish** Erect, slender and formal in habit of growth; foliage sage green. very compact, forming a splendid column. Holds color without change all through the winter. Price, 18-24-in., \$1.00 each; 2-3 ft., \$1.25 each; 3-4 ft., \$1.50.

—**Ketleeri** A fairly thick columnar type of Juniper that is compact right to the base. The attractive dark green foliage is a fitting setting for the slaty blueberries which are unusually attractive in winter. Price, 3-ft. trees, \$1.50 each.

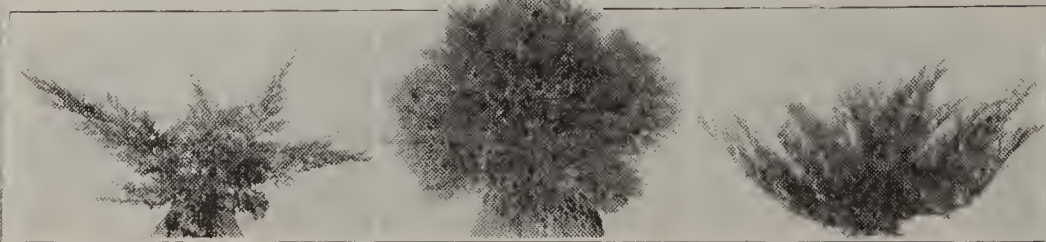

—**Pfitzer** This is the low horizontal growing evergreen with the bluish tint and fine texture of foliage that is so graceful and appropriately used at entrances, in foundation plantings and in front of the taller evergreens. One of the finest of all evergreens. Price, 18-24 in. plants, \$1.00 each; 2-3 ft., \$1.50 each; 3-4 ft., \$2.00.

(Junipers continued on next page.)

GOLDEN BIOTAS

—**Aurea Nana** (Dwarf Golden Biota) Similar to Biota. Compact in shape but foliage is lighter green with beautiful golden tips. One of the aristocrats of evergreen varieties. Price, 15-in. plants, \$1.25; 18-in., \$1.50; 3-ft., \$3.00.

—**Aurea Conspicua** (Gold Spire Arbor Vitae) Golden yellow in summer, bronze yellow in winter. Distinctive, well filled and upright in growth. Price, 15-18 in., \$1.00; 2-ft., \$1.25 each; 3-ft., \$1.50 each; 4-ft., \$2.00.

Pyramid Arbor Vitae

Pfitzer Juniper

Mugho Pine

Savin Juniper

Irish Juniper

All evergreens are priced by express, not prepaid

EVERGREENS

All Evergreens are priced by express, not prepaid.

JUNIPERS (Continued)

—Savin A low, many-branched Evergreen, usually not growing over 3 ft. high. Branches are spreading, dense, and heavily stocked with short tufted foliage, all forming a beautiful dark green vase-shaped evergreen that will add beauty to any planting. Retains its deep green color throughout the winter. Price, 18-in. trees, 90c; 2-ft., \$1.00; 3-ft., \$1.25.

—Squamata Meyeri A handsome Evergreen quite unlike any other bush conifer. A number of unequal branches ascend from the roots and give the plant an unusual and interesting outline and rather coarse texture. Distinct silver blue color which in winter is tipped with a faint tinge of lavender. Bushy 15-18 in. plants, \$1.50 each.

J. SQUAMATA MEYERI

HOLLY LEAF MAHONIA (Evergreen)

MAHONIA (Oregon Holly) Low growing evergreen, leaves very similar to Holly, produces clusters of yellow flowers followed by black berries. Thrives in sun or shade. Price, strong 18-in. plants, B. & B., 75c each; 24 in., \$1.00.

PINES

—Austrian One of the most dignified of all the pines, with stiff dark green six-inch needles. Hardy, thrifty and a handsome tree. Price, 3-ft. trees, \$1.25.

—Scotch Forms a beautiful picturesque specimen tree for lawn or background planting. Withstands all adverse weather conditions with equal vigor. Price, 3-ft. trees, \$1.25.

—Blue We have the Morheim Blue Spruce which has the long needles and is the finest color of all. Price, 18-24 in., \$3.50. Also have a few good blue selected from the Colorado Blue Spruce. Price, 3 ft., \$5.00; 4 ft., \$7.50 each.

—Norway Maintains its deep green color throughout the winter. Can be kept trimmed low for foundation planting. Excellent for Evergreen hedge or windbreak. Ideal for outside Christmas Trees. Prices, on strong compact specimen plants, 2-ft., 75c; 3-ft., \$1.00; 4-ft., \$1.50; 5-ft., \$2.00.

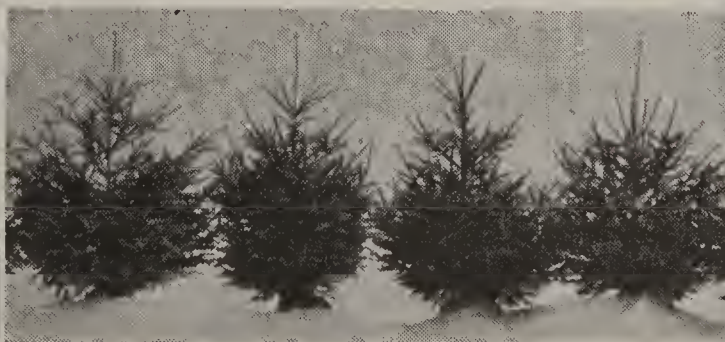

—Mugho This compact low-growing globe-shaped pine is without question the outstanding dwarf Evergreen for all-round use. The color is deep green in summer and winter. It is free from insects and pests of any kind and will grow in almost any location. Price, bushy specimen plants, 15-18 in., \$1.00; 18-24 in., \$1.50 each; 3 ft., \$2.50.

DWARF BOXWOOD A hardy low-growing type of Evergreen Boxwood used extensively as edging and for low edges. The Boxwood is the most desirable low Evergreen hedge plant—especially in shaded and protected areas. This variety is entirely hardy here in Ohio. Also much used in rock gardens and porch boxes for all winter color. Price, strong 12-15 in. plants, 50c each; \$3.50 per dozen.

SPINY GREEK JUNIPER

LAWN GRASS MIXTURE
Best grade Seed for securing a good heavy mat of grass.

NORWAY SPRUCE

CANNARTI JUNIPER

HARDY PERENNIALS

For the Border and Flower Garden

Prices of Perennials on this page are postpaid.

Achillea

(The Pearl)

White flowers, blooms profusely all summer. Valuable for cutting. Price, 20c each; 3 for 50c.

Gaillardia

(Blanket Flower)

An unfailing supply of rich maroon and gold flowers, often 3 in. in diameter. Price, 20c each; 3 for 50c.

Tritoma

(Red Hot Poker)

Showiest of all garden plants when in bloom. The blooms are fiery cones atop long flower spikes. Brilliant scarlet, the opened lower petals rimmed with orange. Price, 25c each; 3 for 60c.

Iberis

Iberis

(Hardy Candytuft)

Dwarf hardy bordering plant with handsome dark evergreen foliage, and when in bloom are a mass of white flowers. One of the best edging and border plants. Price, 25c each; 3 for 60c.

Artemisia Silver King

Artemisia

Silver King

A hardy foliage plant of rare and indescribable beauty; bright silvery foliage. Usually attractive in the garden and very effective for use in bouquets. When cut, can be carried dry indefinitely without losing its color. Each, 20c; 3 for 50c; 12 for \$1.75, postpaid.

Double Hollyhocks RED-PINK-YELLOW-LILAC

These are selected varieties and decided improvement over the old single favorites whose tall spikes of brilliant colors are an asset to any garden or border planting. Price, 20c each; 8 for \$1.00.

Chinese Lantern Plant

The orange scarlet lantern-like fruits are a novelty both in the garden and when cut for the house. The dried fruits (or lanterns) may be kept all winter for decorative purposes. Price, 20c each; 3 for 50c.

Delphiniums

(Larkspur)

Gold Medal Hybrids. An excellent assortment ranging from the lightest blue to purple. Price, 20c each; 3 for 50c.

Gypsophila Bristol Fairy

(Baby's Breath)

Double flowering. The pure white blooms are scattered profusely over the plant and are produced more or less all through the summer. Price, 20c each; 3 for 50c.

Painted Daisies

(Pyrethrum)

A colorful garden show from June throughout the summer, and also a charming cut flower with long slender stems. Price, 20c each; 3 for 50c.

Daphne Cneorum

Garland Flowers

The soft pink flowers appear profusely during April and May and at intervals throughout the summer, with a distinct and very pleasing sweet fragrance. Heavy Plants, 60c each.

Pink Cushion Chrysanthemum

A low compact hardy border plant—a mass of color all through the late summer and fall months—with the bristling pink Chrysanthemum like bloom covering the entire plant in autumn splendor. Blooms first year and with increasing beauty each year thereafter. Price, 30c each; 3 for 75c.

Crimson King

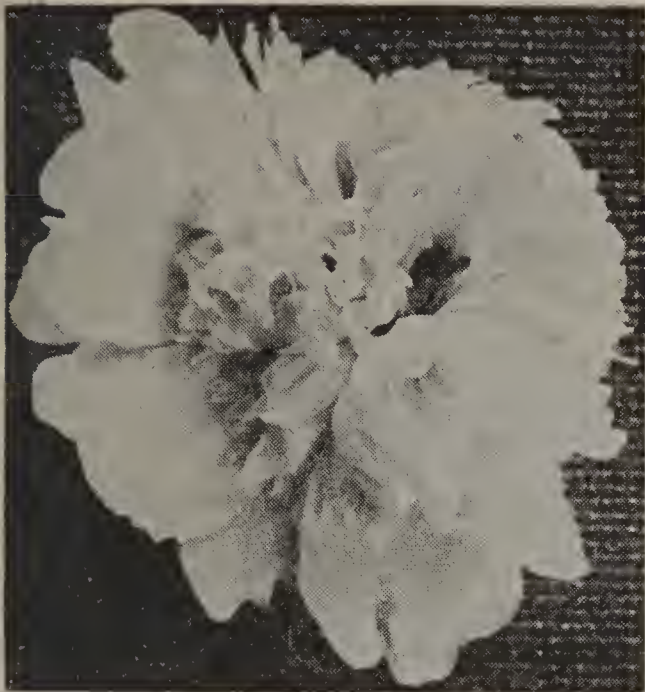

Hardy Everblooming Carnation

A striking red hardy Carnation. Blooms first year and produces flowers of striking beauty over a long period during the summer. Our Double Hollyhocks — Pink Cushion Chrysanthemum and Hardy Everblooming Carnation are three outstanding perennials that should be in every garden. Price, 30c each; 3 for 75c.

Bleeding Heart

One of the most delightful of all early spring flowering plants, bearing numerous rosy red heart shaped flowers, pendant from long arching stems. Price, 40c each; 3 for \$1.00.

FESTIVA MAXIMA
Finest White

PEONY— Queen of Perennials

Golden Yucca

VARIEGATED

A most attractive evergreen plant—useful in front of evergreens, as a border plant or in the rock garden. The golden yellow and green variegated sword-like leaves are conspicuous the year around. Spikes of bell-shaped flowers in late summer.

VARIEGATED—Price, 25c each; 5 for \$1.00.

COMMON GREEN YUCCA—Price, 15c each; 10 for \$1.00.

Prices of all Perennials on this page are postpaid.

SCARFF'S SUPERB IRIS

All prices on this page are postpaid.

These are select varieties and excellent to use for border plantings, edging and in front of taller flowers and shrubs.

AMBASSADOR Truly one of the most beautiful of all the Irises. In richness of coloring, fine form and habit of growth it is one of the world's best. Reddish violet with falls of dark velvety purple maroon. Price, 20c each; 6 for \$1.00.

GOLD IMPERIAL Finest of all the yellow Iris. A lemon-chrome yellow of beautiful form on a thrifty vigorous plant. Price, 20c each; 6 for \$1.00.

LENT A. WILLIAMSON

Standards of Lavender Violet, with velvety pansy violet falls, accented with bronze golden center. Rated as world's best Iris in 1922, by the American Iris Society. Price, 20c each; 6 for \$1.00.

SEMINOLE Rich velvety violet rose color, giving a crimson effect when planted in mass. This is one of the most striking of the improved varieties of Iris. Price, 20c each; 6 for \$1.00.

• Climbing Vines •

NEW "GOLDEN GIANT"

HONEYSUCKLE This new variety is destined to great popularity as it is a vigorous and attractive vine with beautiful, large pale green leaves which form a most appropriate background to the extra-large flowers. The blooms are arranged in large clusters and give magnificent effect. They are tubular, widely expanding at the mouth and their brilliant golden yellow color is enriched by a vivid shade of bronzy red on the outside of the tube. Golden Giant is a strong grower and gives a most desirable climber which combines usefulness with beauty. The vines are laden in June with masses of the large showy flower clusters. Strong 1-year plants. Price, 35c each; 3 for \$1.00.

SILVER LACE VINE (Polygonum Auberti)

This charming climber will clamber gracefully over a trellis, porch, or arch, or any other support. Grows very rapidly averaging 25 ft. in a season. When in bloom it is a cloud of lacy, misty, white with tints of cream and pale rose of most exquisite beauty. Produces more bloom than any other hardy vine and over a long period of time from late summer well into the fall. Price, strong 2-yr. vines, 45c each, 3 for \$1.25; 1-yr., 25c each.

BITTERSWEET The vines become laden with the orange colored berries in the fall. An excellent vine for porches, lattice, and to cover fences. Price, 30c each; 3 for 75c.

BOSTON IVY The most desirable Ivy for chimneys, brick and stone walls. Price, 35c each; 3 for 90c.

ENGLISH IVY A hardy evergreen climbing vine with dark green leaves. It is a true evergreen and retains its bright green leaves all winter. Price, 30c each; 3 for 75c, prepaid.

CLEMATIS

—Paniculata (Virgin's Bower.) In mid-summer the entire vine is clothed in a mass of white bloom, followed by numerous light feathery seeds which are attractive until late in the winter. Price, 35c each; 3 for 85c.

—Large Flowering Blue, Red, and White. Price, 65c each; 3 for \$1.50.

EUONYMUS Radicans Glossy Winter-creeper. A hardy evergreen vine. Very desirable to use on chimneys, walls, lattice or wherever an evergreen vine is desired. When kept trimmed it forms a compact, low, bushy shrub, very attractive around the porch or foundation. Price, strong plants, 35c each; 3 for 90c.

—Colorata Similar to Radicans but the dark glossy green leaves turn a bronze red during autumn and winter. Price, 30c each; 3 for 75c.

HONEYSUCKLE (Sweet Scented.) A well known almost evergreen vine, highly desirable for its beautiful glossy green foliage and for its fragrant flowers. Price, 25c each; 3 for 50c.

KUDZU A remarkable, very quick growing and serviceable porch vine, excellent quick screen, growing 40 to 50 feet in one season. Rose purple, pear-shaped flowers plentiful in August. Price, 25c each; 3 for 50c.

TRUMPET FLOWER From the old garden. Flowers perfect, trumpet-shaped, orange red. A rapid grower, one of the finest vines for covering fences, trellises, etc. Price, 25c each; 3 for 50c.

PURPLE AND WHITE WISTERIA Price, 40c each; 3 for \$1.10.

ROSES MOST BEAUTIFUL OF ALL FLOWERS

ROSA ROULETTI The Miniature Rock Garden Rose. For many years this beautiful rose was lost to cultivation. Several years ago a plant was found growing in an Alpine window-garden by M. Correvo, the famous Swiss horticulturist. It is rapidly attaining popularity as a rock garden plant and as an edging subject. The plant grows about six to seven inches tall and blooms from early summer until heavy frost. The tiny rose-pink, quite double flowers are less than an inch in diameter. Price, 1-year plants, 30c each; 3 for 75c.

POLYANTHA Dwarf Everblooming Baby Ramblers. These miniature roses are most desirable for their continuous vivid colored blossoms throughout late summer and early fall. They show up exceptionally well when planted in the border with evergreens for a background. We consider the following varieties among the best of their respective color. **CECILE BRUNNER**—pink. **EDITH CAVELL**—red. **GOL SALMON**—orange red. Price, Polyantha Roses, 2-year field grown, 35c each; 3 for \$1.00.

PRIMROSE—New Yellow Rambler

PRIMROSE At last a real hardy yellow rambler, of light Primrose yellow color which does not fade. Vigorous, healthy climber, free flowering and blooms hold on a long time. Price, 2 yr., field grown, 40 cents.

Dear Sirs:

The shipment of evergreens arrived yesterday and are highly satisfactory in every way. We have never had nursery stock of any kind arrive in such good condition, thanks to your great care in packing. Instructions were carefully followed in setting the trees and we are more than pleased with results. We will recommend you to neighbors and friends at every opportunity.

Mr. and Mrs. George Fowler,
March 18, 1935. Missouri.

TREES AND SHRUBS PRODUCING ROSE-LIKE BLOOM

It is interesting to note how many plants produce rose-like blossoms and we are listing a few of them which are described more fully in the preceding pages of this catalog.

ALMOND, FLOWERING—Pink.
CRAB, BECHTEL'S FLOWERING—Apple Blossom-Pink.
KANZAN—PINK FLOWERING JAP CHERRY.
KERRIA—GLOBE FLOWER—Yellow.
SPIREA PRUNIFOLIA—TRUE BRIDAL WREATH—White.

SCARFF'S NATURALLY DRIED CAREFULLY SELECTED SEED CORN

OUR SEED GUARANTEE IS ON INTRODUCTORY PAGE

WHITE CAP

For Poor Land

Insure Your Corn Crop by Planting Our Special Strain

No other corn will produce more bushels of good solid ears on thin land than our special strain of White Cap. For over thirty years this variety has been grown by us, and no pains spared to improve it for the special purpose of high yield and well-developed ears. It not only yields well on thin land, but responds to high culture and rich soil as any other corn. It will do well on either clay or black soil and every farmer should grow one or more fields of this variety to insure against crop failure. The ears are slightly tapering, averaging about $9\frac{1}{2}$ inches long. Stalks with plenty of blades, making excellent fodder. It matures in 100 to 110 days. As the name implies, it is a white cap corn—not a white corn, but yellow kernel with a small cob, and moderately deep grains filled out to the very ends. See enclosed leaflet for prices.

WARNING FOR 1936

Not since the fall of 1917 did corn go into cribs carrying so high a percentage of moisture. The continued wet weather throughout the entire fall and winter has retarded the natural drying process and encouraged molds and disease of all kinds that affect corn. The result is—

LOW GERMINATION OF PRACTICALLY ALL CORN

Our seed was in our warehouse by November 25. The furnaces and battery of fans were kept going day and night until we thoroughly and carefully dried our corn below the danger point. In fact the temperature has never reached 25 degrees above zero.

Ear White Cap
Corn

One bushel of seed corn will plant around 7 acres. No other seed is so cheap per acre and you depend more on your corn crop than all the rest. Good germination will do more to help you raise a bumper crop than any other one factor. We specialize in the care of Seed Corn and when you buy your Seed Corn from us you can be sure the germination is exactly as it is marked on the tag. Why take a chance for only a few cents per acre. We receive hundreds of letters from customers telling how our strains have increased their yields. In fact many Farmers depend upon us for their Seed Corn each season. It pays them and it will pay you.

Ear White Cap
Corn

EARLY WHITE DENT FINEST QUALITY FOR EARLY CORN MEAL

We recommend Early White Dent to be one of the very best early white varieties. It is a strong, thrifty grower and an exceptionally heavy yielder for an early corn. If you plant early you can be the first in your community to have white corn meal. It matures for us on clay soil in about 90 days. Note the good-sized ears in cut below. The cob is not large and grains very deep. You will like this early variety as it fills the need for a white general purpose corn better than any kind we know anything about. Try a small acreage and allow it to prove itself. See enclosed leaflet for prices.

I raised 110 bushels of corn per acre from your White Dent last year. I was very much pleased with it.

March 31, 1935

E. R. Boswell, Mahoning Co., Ohio.

Note the large grains and small cob.

OUR SEED CORN WAS FULLY PROTECTED BY THE FURNACES IN OUR SEED HOUSE AND HAS NEVER BEEN SUBJECTED TO FREEZING WEATHER. "PLANT SAFE SEED."

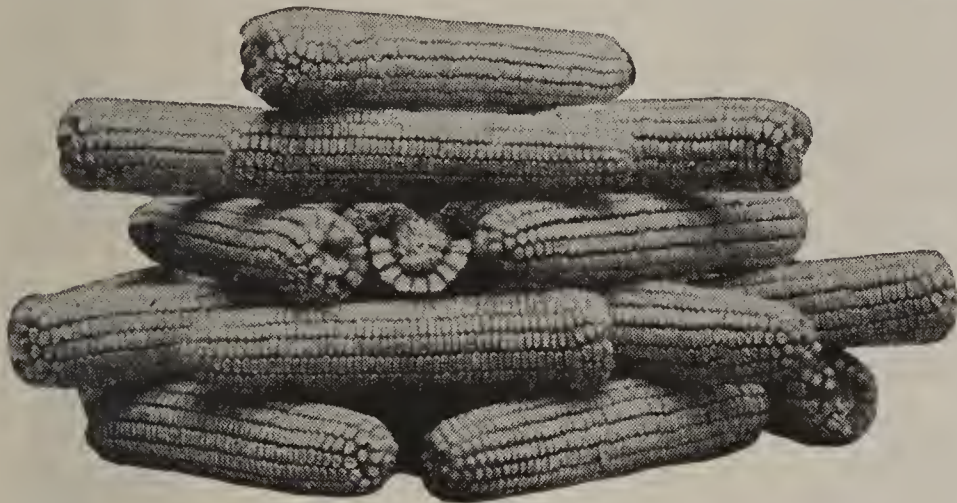

Scarff's Cash Corn

Best Early Feeding Corn Grown on Our Farms

Stalk medium height with ears placed evenly about four or five feet from ground. Matures 90-100 days, depending on soil and season.

DEEP GRAIN—SMALL COB—FINE FOR HOGGING DOWN

We cannot emphasize too strongly the value of this variety of corn. It is the highest yielding early kind we have ever grown. Has strong, healthy stalk, having many blades of deep green foliage. We have planted as late as June 15, and secured a good crop. Generally speaking the early planting always gives the greatest returns. The ears are medium to large with good dry grain having exceptional food value. The cobs are small and deep red. **WE GROW MORE CASH CORN ON OUR FARMS THAN ANY OTHER VARIETY.**

Average Ears of Cash Corn

ticed in the field a few stalks that matured much earlier than the balance of the corn. The ears produced from these stalks had the same characteristics of our Cash today, except the grain was of reddish cast and more loose on the cob. By careful selection through the years we have developed the beautiful yellow, early maturing, solid corn we are offering this season. You will like this corn and it will prove very profitable for you. The changing season requires an early maturing variety. Cash will produce as many or more bushels of good solid grain than any other variety. See enclosed leaflet for prices.

The half bushel Cash Corn that we bought last year averaged two bushels to the shock, ninety-six hills. It beat our own quite a bit from a peck to half bushel to the shock.
Hermon Ackers,
Fairfield Co., Ohio.

History of Cash

Nearly twenty years ago we were growing Early Golden Surprise when we no-

Crow, bird and animal repellent saves seed corn. Corn and other seed treated with No-Crow will be perfectly safe. Crows, Pigeons, Moles, Pheasants, Gophers, Wood Chucks, Squirrels, etc., hate No-Crow and will not touch treated seeds. Fully described on page 49.

EARLY LONGFELLOW FLINT Easily the most popular of the Flint varieties. Ripens very early and furnishes feed long before other corn is near ready. The stalk is medium size and has long, beautiful, 8-row, yellow ears. It is especially adapted to poor ground but we have raised 60 bushels on some of our heavier soils. You should try a small field of Flint for early use. See enclosed leaflet for prices.

RED RIVER or SMOKEY DENT This variety is sometimes called 90-day red corn. It is not completely red as the kernel has a white cap. When planted early it matures fully two weeks ahead of the main crop and makes good early feed for the hogs and dairy cows. The fodder is medium in height, has lots of blades and the stalk produces an abundance of brace roots which help make it very rigid in the field. You should try a field of Red River. Our strain during the last two years has yielded heavy crops while other kinds were seriously injured by the hot dry weather. This year Red River made 75 bushels per acre. See enclosed leaflet for prices.

Scarff's Yellow Clarage

HOLDS FORMER WORLD'S RECORD FOR YIELD

This variety is a general favorite wherever grown, especially does it appeal to those who like to produce show corn. It has been so carefully bred that every ear is of the same type and in so breeding the ability to produce has been very greatly increased. It is easy to husk and one of our very best feeding corns. A load of Clarage will outweigh almost any other variety.

Our Yellow Clarage this season yielded around 80 bushels per acre of extra fine solid corn. It is one of the very highest producers of its season in the open pollinated varieties and is consistent in its performance.

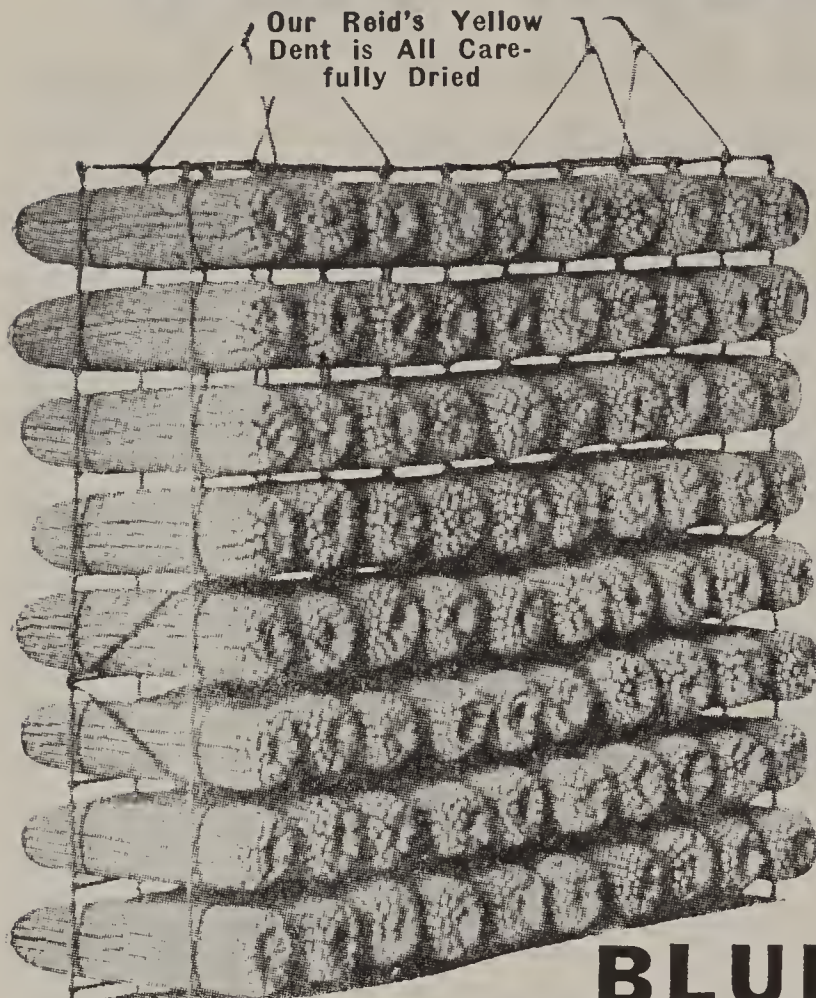

Clarage matures in about 105 to 110 days. Average length of ear about 8½ inches. Average height of ear on stalk from 4 to 5½ feet. Foliage very heavy, making excellent fodder and where high percentage of corn is desired it makes wonderful ensilage. The foliage gives it a heavy tonnage. We fill several of our silos with Clarage each season and recommend it as one of the best early maturing varieties for that purpose. See enclosed leaflet for prices.

Yellow Clarage Ears

REID'S YELLOW DENT

Our Reid's Yellow Dent is All Carefully Dried

MEDIUM SEASON — LARGE EARS
GOOD FODDER

Our strain of Reid's is especially adapted for Ohio conditions. It is more of the smooth type that has been producing the highest yields. Grains are well dented and set close together on the cob in very straight and well defined rows. This variety is one of the most popular of the medium season yellow sorts. This year our yield was 80 bushels per acre on nearly 30 acres. The corn was of exceptionally good seed quality. We certainly recommend our strain of Reid's Yellow Dent to be one of the best and urge you to try one field at least. You certainly will be well repaid. Many growers like it because it does not shell when husking with machine as easily as some of the earlier kinds. It is fine for ensilage, will produce a heavy tonnage and its early maturity will permit you to fill your silo in good time. This season is an ideal time to get started with Reid's. See enclosed leaflet for prices.

If Crows, Pheasants, Gophers or Moles bother your corn use No-Crow animal repellent fully described on page 49.

BLUE CLARAGE

ESPECIALLY EARLY FOR HOGGING DOWN. MATURES 85-95 DAYS

This is a general favorite of the very early varieties. Produces heavy yield of good well-filled ears. Grains are deep and very broad, color is blue, hence the name. Many growers use and sell it as sweet corn as it is white until it begins to dent. When thrown to stock along with yellow corn they will eat the blue first. **HAS VERY HIGH FEEDING VALUE.** The stocks are of medium height and carry heavy foliage. It is a very vigorous grower and can be planted earlier than most kinds.

Many farmers in our neighborhood use it for their main crop where all corn is fed on farm. Feeders generally pay a premium for Blue Clarage. We especially recommend it to you. See enclosed leaflet for prices.

Bloody Butcher Stalks

IMPROVED LEAMING

We grow the strain that is proving the most satisfactory for Ohio conditions. The color is deep rich yellow. Ears uniform and tapering which is characteristic of the variety. It matures in 95-100 days and is an all-round feeding corn that will put on fat quickly. See enclosed leaflet for prices.

Blue Clarage

Golden Cross Bantam Hybrid and New Wonder are outstanding New Sweet Corn varieties. Exceedingly delicious and by far the best for Home Garden. Commercial growers are planting large acreages. Fully described on page 41.

BLOODY BUTCHER

The most popular medium early mixed variety grown. Matures 95-100 days. An exceedingly heavy yielder. The stalk is medium size and ear is medium to large and carries its circumference clear to the tips. The grains are red and white streaked making a very beautiful appearance. We have many farmers who prefer it to any other variety because of its deep grain and fine feeding qualities. Our seed is from a heavy yielding strain and carefully graded and tested. See enclosed leaflet for prices.

Treat your Seed Corn with new Semesan Jr., for increased production of better quality corn.

Bloody Butcher Ears

WARNING — WARNING — WARNING

Test your Seed Corn now. The early cold weather has completely destroyed the germination of much of the exposed corn. Good seed will be scarce. Our seed was carefully protected and never below freezing. Order now before we are sold out.

WOODBURN GOLDEN

Best Midseason Variety

YELLOW DENT

Our seed corn was secured from Mr. Woodburn (in Champaign County) soon after it was introduced. We bought several of his entire crops and have carefully bred and selected until we can safely say it is one of the best producing varieties of good solid corn in Ohio today. Our experience is backed by many of the leading corn growers of the State. It ripens 5-10 days later than Cash and together make an excellent combination, both yielding heavy crops and the Cash maturing earlier gives you an opportunity to have it out of the way just in time for the Woodburn.

The Standard Midseason Variety

Woodburn has an accredited yield of 134.31 bushels corn per acre in Men's 10-acre contest. Has been a consistent heavy yielder of good solid corn carrying highest feeding value. **It is the standard mid-season corn.**

Large ears of golden yellow corn with big deep grain will always distinguish Woodburn from any other variety. So popular has it become that it has won a special class in practically all corn shows in Ohio and other states. The stalks are medium size, carry plenty of blades and the ears are about 4-4½ on the stalk. Many stalks carry two ears measuring about 9 inches on average soil and larger in proportion to the fertility. Woodburn has never failed to produce a good yield for us and has won a permanent place on our farms. It will not disappoint you and may increase your yield many bushels per acre. See enclosed leaflet for prices.

WARNING

WARNING

WARNING

Corn carried more moisture this year than it has since the wet season, 1928, or perhaps back in 1917. We have had several days when the temperature has registered zero or below. If it has not actually killed the corn germ it has so weakened it that a weak sprout will result.

Our Seed Corn was protected in our Seed House from all cold weather. It has all the original vitality. Order your Seed Corn today before it is too late.

Early Golden Surprise

Will mature anywhere in the corn belt. A great deep grained high quality feeding corn. The cob is small and many times we have shelled 60 to 62 pounds of shelled corn from 70 pounds of ears. The stalk is of medium size and stands very erect. There are a great number of blades which makes it valuable for feed. We recommend Golden Surprise where you want to hog on part of the field and allow the balance to stand. In fact, it fits in any program you may have because of its two outstanding characteristics, first being medium early and second a very heavy yielder. We are sure you will like Golden Surprise. See enclosed leaflet for prices.

Lancaster Sure Crop

For Main Crop and for the Silo too

This variety, originally from Pennsylvania, is becoming so well known and so popular among all corn farmers that it is rapidly replacing many of Ohio's old favorite kinds. It grows a tall stalk with plenty of blades. Matures in about 105-110 days and is wonderful for ensilage. In comparative tests it has outyielded all kinds for green weight per acre except the very late ensilage varieties that will not mature except under extraordinary conditions.

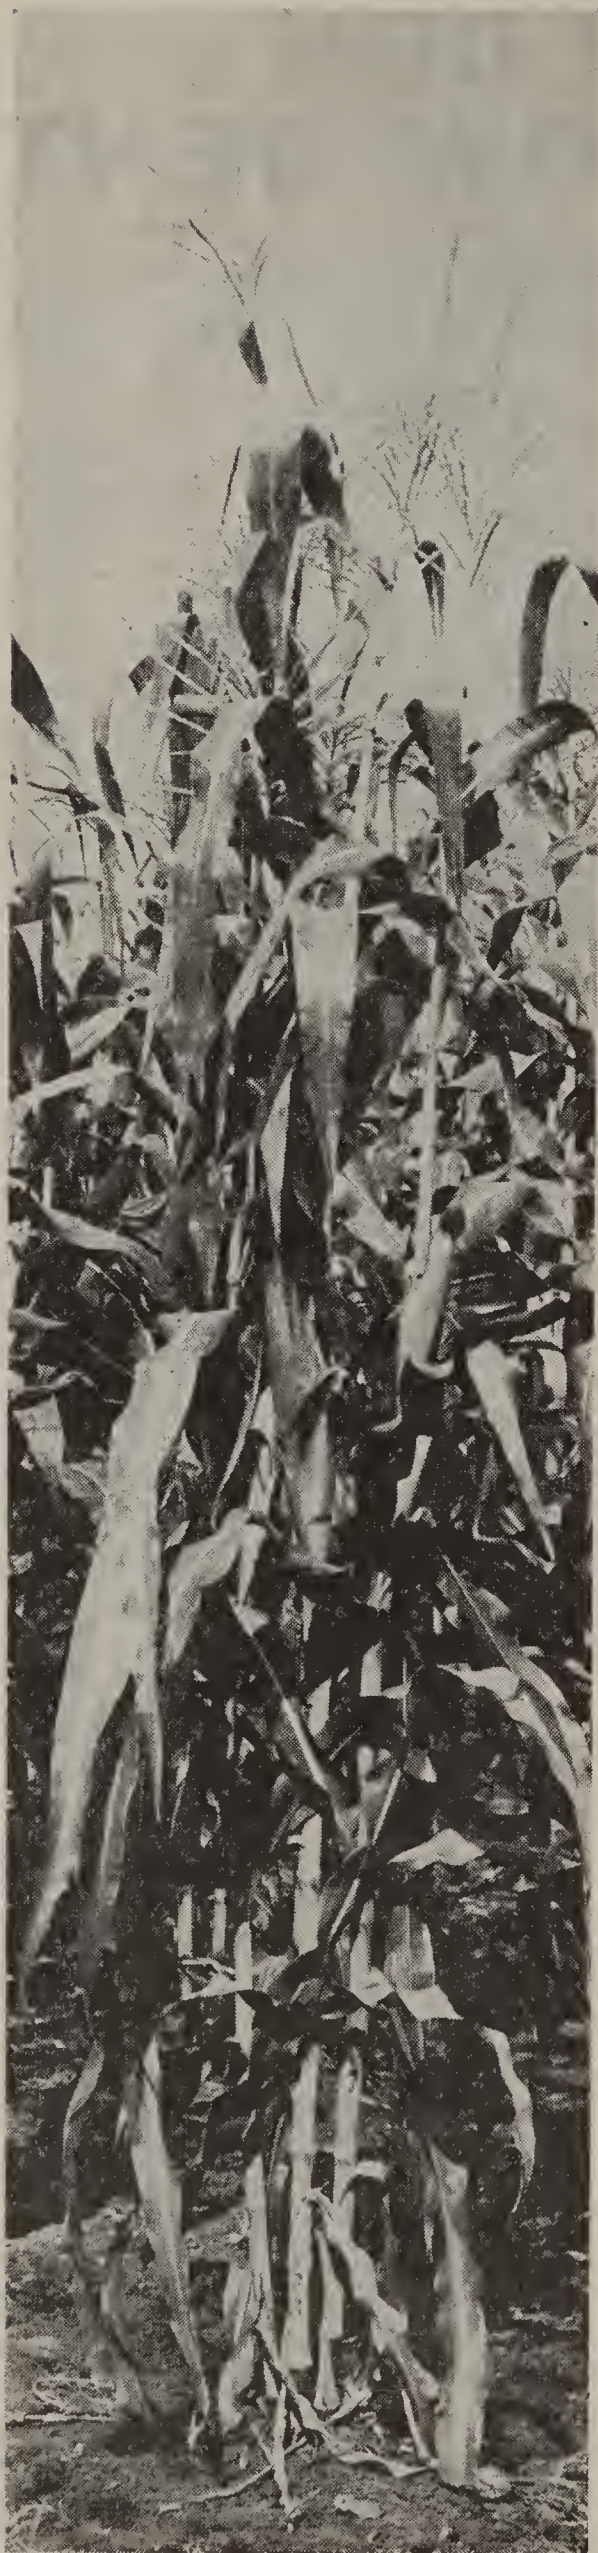

On our farm this last season it was not planted until May 30th. It grew vigorously and yielded around 75 bushels per acre average with many ears measuring 14 inches. This was an unusual season but it matured and was ready to crib by November 10th. See enclosed leaflet for prices.

Lancaster Sure Crop Ears

Woodburn Matured Stalks

Ensilage Corn

ENSILAGE CORN

A Good Well-Filled Silo Means Farm Insurance

The variety you use is very important. You cannot afford to put the greater part of your corn acreage in the silo and our experience has shown some kinds are much more adapted to plant for the silo. If you are feeding for beef, we suggest you plant Lancaster Sure Crop, page 37, or Clarage, page 35, unless soil is very poor when one of the ensilage kinds is best, preferably Conner's Prolific. If feeding for milk production, the varieties below are unexcelled.

Conner's Prolific Ensilage

YIELDS TWO TO SIX EARS ON EACH STALK

Description. The color of the grain is white, the average length of the ears is 8½ inches, and each stalk bears from two to six ears. The stalks range in height from twelve to fourteen feet, according to season and fertility of the soil.

This wonderful new variety makes an abnormal growth producing an abundance of foliage and a greater tonnage than any other ensilage we have ever produced. It stands up well, is a quick, vigorous grower and beyond doubt, the best ensilage variety you can grow. If you have grown it you will want it again this year. If you have not as yet tried this kind you cannot afford not to plant at least a portion of your field and notice the difference. See enclosed leaflet for prices on seed corn.

Reid's Yellow Dent

We have developed a late maturing variety of Reid's Yellow Dent that we are proud to tell you ranks with the very best of the ensilage varieties. The ears are very large which will insure an abundance of corn. The foliage is dense and you will be surprised at the small acreage that will be required to fill your silo. Nor is it too late to mature for you in the ordinary year. It has the same identical description as given on page 36, except it is a few days later in maturing. See enclosed leaflet for prices on seed corn.

Johnson County White

Corn pure white and cob same color. The ears run from ten to eleven inches in length and about eight inches in circumference. The stalks make a good vigorous growth, well braced with a good system of brace roots, capable of withstanding severe wind storms, as well as drought. It is a variety very rich in protein, hence valuable for feeding purposes, also valuable for silo, as it makes as much fodder as the regular ensilage corn and so much larger proportion of ears, hence a much richer ensilage. See enclosed leaflet for prices on seed corn.

Lancaster Sure Crop

This variety, fully described on page 37, is one of the outstanding early heavy tonnage yielding ensilage kinds that will mature good solid feeding corn. Grown extensively all over Ohio. You are sure of good ensilage if you plant Lancaster Sure Crop. See enclosed leaflet for prices on seed corn.

PAMUNKEY ENSILAGE An extremely large heavy yielding ensilage variety. Grows very tall and stalk is exceptionally sturdy. Stands up when most other varieties blow down. Yields 16 to 20 tons silage per acre. Plant Pamunkey and you will be surprised how quickly you will fill your silo. See enclosed leaflet for prices.

ORANGE CANE (SORGHUM) This is one of the very best Cane varieties. It is 5 or 6 days later than Amber Cane, grows much larger and produces more syrup. This variety is of special value for planting with corn for the silo. Price, per lb., postpaid, 20c; by express not prepaid, lb., 15c; 10 lbs., \$1.00.

AMBER CANE (SORGHUM) A general favorite, grows 10-12 feet high. Can sow as late as July. Requires one package seed per acre. Many farmers plant cane with their ensilage corn. Price, per lb., postpaid, 20c; by express not prepaid, lb., 15c; 10 lbs., \$1.00.

JAPANESE BUCKWHEAT This variety produces the heaviest yield of the best quality buckwheat; can be sown as late as August using about one bushel seed per acre. Price, per bu., \$1.50.

HYBRID FIELD CORN

"The final results of five years' work with 76 Experiments all over Ohio show Hybrids have yielded 10 to 20% more than open pollinated varieties. The most productive Hybrids have yielded 11 to 29% more than the most productive open pollinated kinds."

The above is partial report of table 36, page 30, of "Handbook of Exp. in Agronomy" published by Ohio Experiment Station.

HOOSIER HYBRID—Indiana Three Way Cross No. 660—Especially adapted to the fertile upland and second bottom soil of central and southern Ohio. The season is the same as for Eichelberger Clarage which is classed as an early mid-season variety. Our neighbors have been using this Hybrid for several years with around 15 to 20 per cent increase in yield over ordinary open pollinated kinds.

SCARFF'S HYBRID (AxR4) (HYxTR)—This Hybrid is a double cross of Indiana lines that have been consistent, good yielders of excellent quality corn. They are probably used in more combinations, which proves their merit, than any other lines today. This variety is about the same season as Yellow Clarage and is especially adapted to the uplands of central and southern Ohio.

Be sure of the Hybrid seed you plant. The high yield of any combination of inbred lines depends directly upon the lines themselves and the way in which they are used. Play safe and purchase seed only from reliable sources. The first generation cross only produces the high yield along with stiffness of stalk and other desirable characteristics. You can depend upon the Hybrids we offer.

All of our Hybrid corn will be graded into two grades, large and medium, flat kernels, and two grades, large and medium, round kernels. The flat grains are for use in edge drop planters and the round for hill drop machines. The medium grains in each case will plant about 1 acre to 2 acres more than the large grains. There will be no difference in the productivity of either kind.

HYBRID FIELD CORN - OUTSTANDING FOR YIELD

Photograph taken from one of test plots.
Note the many long ears.

Prices of all varieties Hybrid Corn

FLAT GRAINS

Large	{	\$7.00 per Bu.
or		3.50 per ½ Bu.
Medium		2.00 per Peck

ROUND GRAINS

Large	{	\$6.00 per Bu.
or		3.00 per ½ Bu.
Medium		1.75 per Peck

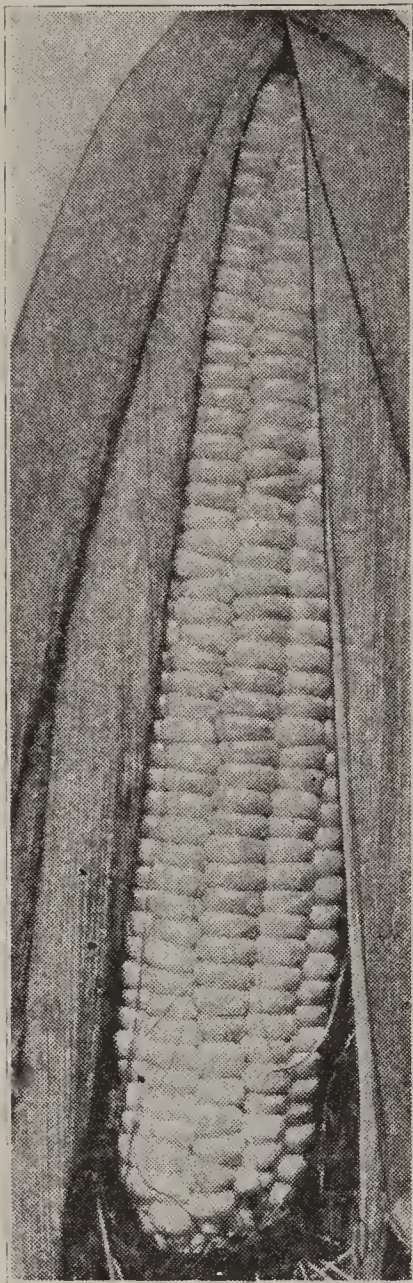

This new method of corn breeding bids fair to revolutionize corn production methods. Bigger yields and better stalk characteristics than we ever thought possible are here now with Hybrid varieties.

Test Hybrid Corn with your own variety. Try at least a small amount of Hybrid seed. See the advantages yourself. You cannot afford to ignore this progressive step in corn breeding. It is to your benefit in dollars gained. The supply is limited. Order today.

As better Hybrids are introduced, Scarff's will have them.

SWEET CORN

PRICES, SWEET CORN SEED, except where otherwise noted, per ½ lb., 20c; lb., 35c; 2 lb., 65c, postpaid; by express, not prepaid, per lb., 20c; 5 lb., 75c; 10 lb., \$1.20.

Ear of "New Wonder"

Country Gentleman

of its tenderness, sweetness and very delicious flavor. Ears are 7-8 inches long and grains are zigzag or staggered.

Stowell's Evergreen

The standard of the later kinds. Especially desirable for the commercial growers and canners. It is hardy, thrifty, productive and very sweet and tender. Everyone knows the good qualities of Stowell's. Our seed is northern grown and very hardy.

New Wonder New white variety. Produces 2-5 ears per stalk. Plant only half as thick as ordinary sweet corn. Ripens medium season and sweeter than most any other variety known. The stalks are erect and carry many blades. You will be surprised at the enormous yield it will make and the delicious flavor of the corn. For canning it is unexcelled and if you market the corn it is easy to develop a trade that will use no other kind as long as they can get New Wonder. We have grown it for five years and certainly recommend it highly to you. Try a small patch at least and be convinced.

Golden Bantam This variety is probably the earliest, hardiest and most popular of the early yellow kinds. Generally it can be planted with safety a week earlier than other kinds. Our seed is northern grown and extra nice.

Early Adams Perhaps the earliest of the Sweet Corn varieties and a favorite with the gardener who is after the early market. Our seed is of the best strain.

Early Evergreen An early favorite. Kernels are deep, very white, sweet and tender. One of the most desirable of the early kinds for the home garden as well as for commercial use.

Whipple's Early White

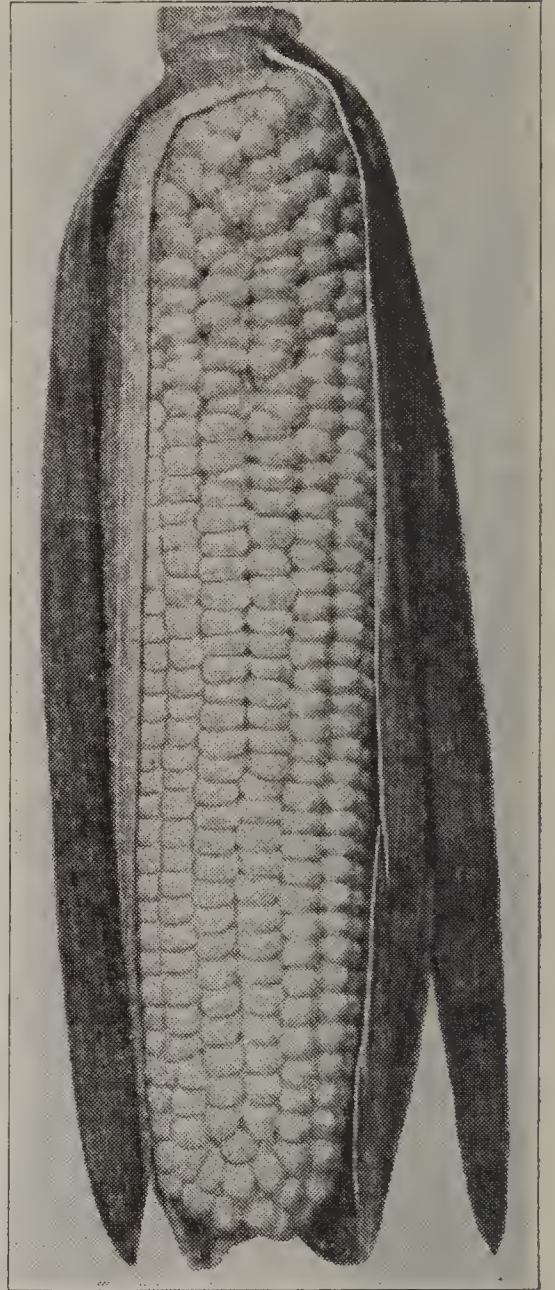

Recognized as most popular early white variety. Ripens about same season as Golden Bantam. Ears are 8-9 inches long and have 16-18 rows of exceptionally white sweet grains. One of the best for either home gardens or market.

Whipple's Early Yellow

The description of this variety is identical with Whipple's White above, except the corn is yellow. For those desiring the yellow corn we recommend it to you very highly. It is a very prolific yielder of fine flavored corn.

Howling Mob A popular, very prolific second early kind. Produces medium large ears, 12 to 16 rows, follows Early Evergreen in maturing and is used extensively for market purposes.

Among the very best of all mid-season varieties for the home garden because

Stowell's Evergreen

Treat early planted sweet corn with Semesan Jr. to prevent rotting, and for better germination in the cold ground. Described on page 49.

Myers Perfection Pop Corn

POP CORN

Myers Perfection

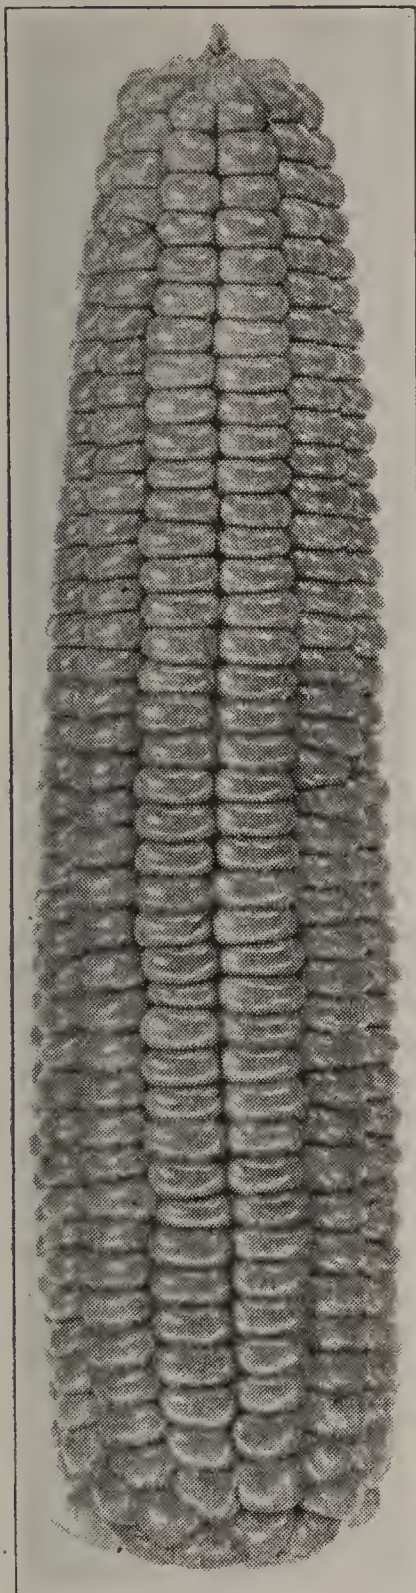

New variety of hull-less pop corn and one of the most delicious of them all. Larger than ordinary hull-less and will produce twice as many bushels. Although just being introduced it is replacing most of the older favorites with the commercial poppers wherever it has become known. Try some of this wonderful pop corn. Price, per ½ lb., 15c; lb., 25c; 2 lb., 40c, postpaid; by express, not prepaid, lb., 15c; 5 lb., 60c; 10 lb., \$1.00.

Giant Yellow

South American Pop Corn. Pops exceptionally large yellow grains of delicious flavor. Very popular now in commercial use. Is medium season and a good producer. Price, per ½ lb., 15c; lb., 25c; 2 lb., 40c, postpaid; by express, not prepaid, lb., 15c; 5 lb., 60c; 10 lb., \$1.00.

We offer Japan Hull-less and Queen's Golden, both standard varieties of Pop Corn at prices quoted for other varieties. Our seed is all of the best quality.

GOLDEN CROSS BANTAM

New Hybrid Sweet Corn

Developed by Glenn M. Smith, of Purdue University, and introduced by the U. S. Dept. of Agriculture and the Purdue Experiment Station. This corn is outstanding because of its resistance to Stewarts disease or bacterial wilt and because of this factor can be planted exceptionally early and you can be certain of a good crop. It is extremely prolific and produces high quality Sweet Corn for either roasting ears or canning purposes. Many of the large commercial canning companies are already using this new variety with wonderful success.

No garden whether for home or commercial use is complete without Golden Cross Bantam.

The ears are larger than Golden Bantam and have 10 to 14 rows. The kernels are of medium width and depth. The color is not quite as deep yellow as Golden Bantam and it is four to eight days later. Since however it can be planted earlier it is one of the very first to be on the market and the earliest Sweet Corn always demands the highest price. We have grown it on our farms and we are recommending it to you very highly. We know of no other variety which combines so many good qualities, has as delicious a flavor and yields so heavily as Golden Cross Bantam. Ask your County Agent or your university about this wonderful new Sweet Corn and we know you will give it a trial.

Price, per pound, postpaid, 45c; per pound, express, not prepaid, 40c; 10 lbs. or over, 35c per lb.

Sept. 16, 1935

Gentlemen: From the pound of Golden Cross Sweet Corn procured from you I have sold 150 dozen at 20c to Miss Grace E. Smith, owner of our finest cafeteria.

Ernest Rivers, Lucas Co., Ohio.

April 17, 1935.

Dear Sirs: I would like to have one of your Seed Catalogs. Our Vocational Agriculture teacher got some of your "Golden Cross Bantam" Seed Corn last year and gave us a little of it. It was the finest corn we ever raised.

J. W. Nichols, Richland Co., Ohio.

Sept. 1, 1935

Dear Sirs:

Please send me your price on Seed Wheat soon. The seed I bought of you last spring was wonderful. I had the best Oats in the county. The Seed Corn made a fine crop. The Golden Cross Bantam Sweet Corn I got a premium by 5c per dozen. I shall plant 5 acres next spring. All your seed was O. K. The New Wonder Sweet Corn sold fine, too.

Joe B. Gillespie, Butler Co., Ohio.

SQUASH HUBBARD SQUASH

Plant in hills 6-8 feet apart after ground is warm and fairly dry. Hubbard is the best of the squashes and a general favorite everywhere. Flesh is rich orange yellow. It is sweet and has wonderful flavor. It has hard shell and will keep until late spring. Price, pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.25, prepaid.

GIANT GOLDEN SUMMER CROOK-NECK SQUASH

The king of the crook-neck varieties. It is of dwarf bushy habit and is very productive. The fruits are rich golden yellow and are thickly warted. A good cooker. Price, pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.25, prepaid.

PUMPKINS

One ounce plants 15-20 hills. Two to three pounds to the acre.

KENTUCKY FIELD Grows around two feet in diameter. Good for pies and the best for stock. Price, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

SMALL SWEET (Sugar) Wonderful for pies. Flesh is very fine grained and exceptionally fine flavored. Price, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

MAMMOTH PRIZE RED MANGEL (For Stock Feeding). Succeeds on any medium or heavy soil. The roots are large, uniform, and are enormously productive. Price, pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 60c; 5 lbs., \$2.25, prepaid.

GOLDEN CROSS
BANTAM

For Big Crops of Soy Beans

SCIOTO

Wonderful New Variety

Scioto was developed by the Ohio State University and released for distribution in 1933. We grew Scioto for the first time last year with wonderful results. The stalk as you note by the picture was very tall with stiff stem and set on an abundance of pods. It has been yielding at least three to five more bushels per acre than either Illini or Manchu. It is slightly later than Manchu and beans are similar but somewhat smaller. It has proven an exceedingly good variety for all over Ohio and especially is it adapted to the Southern half of the state. Why plant another variety when Scioto is so outstanding in every way. Price Scioto Soy Beans \$1.60 per bushel.

The table below shows Soy Bean Average Yield per Acre in three locations.

Variety—	Wooster	Columbus	Henry County
	5-Year Average Bu.	6-Year Average Bu.	5-Year Average Bu.
Scioto	29.0	32.9	22.0
Manchu	25.2	29.0	20.9
Illini	24.6	29.0	21.1
Dunfield	24.3	26.0	20.9

Dear Sirs:

November 18, 1935

I would like to place my order for one half bushel of your Ohio Hybrid Corn (51x67) (10xTr) from the list that I received from the Franklin Co. Agriculture Agent.

I have bought from you in the past and know that if it comes from Scarff's it is good. I raised about the finest field of Soy Beans I have ever seen from your Scioto seed.

Arthur Fisher, Franklin Co., Ohio.

ILLINI A medium season variety of yellow Beans that are a general favorite in Illinois. The table above shows that they are heavy yielders of both hay and beans in Ohio. We have grown them and know they are all right. We have a fine lot of seed. Price, \$1.25 per bu.

MANCHU A midseason variety used both for HAY and SEED. It grows erect from 36 to 48 inches tall and carries an abundance of foliage, making it ideal for the production of hay. If sown around middle to last of May can be cut around last of August when weather is good for curing. We use Manchu on our farms and have hauled in four to six big loads of hay per acre. The quality and feeding value of Soy Bean Hay equal Alfalfa. **FOR SEED**, the Manchu produces from 20 to 30 bushels per acre. The bean is yellow, medium sized, with black or brown seed scar. It excels other kinds because the beans do not shatter. Manchu is the ideal general purpose bean. Price, \$1.30 per bu.

WILSON A medium sized black bean of unusual qualities, wonderful hay bean, grows very prolific, with many leaves. Is heavy yielder of beans and a variety we recommend very strongly. Plant a few of these beans in the corn you put in the silo. Price, \$2.50 per bu.

VIRGINIA A light brown vining type variety that is very popular for either hay or planting with corn for ensilage; generally too late for seed. Price, per bu., \$2.50.

Stalk of Scioto

Inoculate Soy Beans with Nod-o-gen—Special price on large lots—described on page 48.

Inoculate Soy Bean Seed with Nod-o-gen for most luxuriant growth of foliage or higher production of seed. Either Dust or Liquid. Full description on page 48.

Every Farm SHOULD HAVE AT LEAST ONE FIELD of Soy Bean Hay

Scarff's Gopher Oats

NEW VARIETY PROVES HEAVY YIELDER AGAIN IN 1935
WHITE — EARLY AS FULGHUM — STIFF STRAW

Gopher Oats is an early white open head variety, producing heavy good quality grain with remarkably stiff and erect straw. The white plump kernel gives it a fine appearance and as it contains little hull it is an excellent oats for grinding.

Fills Need for an Early, Heavy Yielding White Oats

The demand for this new heavy producing variety was very heavy last season and we now have quite a few orders already for 1936.

If you have not given Gopher Oats a fair trial we urge you to sow a small field and compare with the kind you have been growing.

Price per bu., \$1.00; 10 bu. lots, 90c per bu.; 25 bu. lots or over, 85c bu.

SCARFF'S GOPHER OATS

We received many letters telling us of large yields of Gopher—we have room for only the one.
Oct. 10, 1935.

Dear Sirs:

About four or five years ago I sent to you for some Gopher Seed Oats. This year I threshed seven hundred and fifty bushels off eight acres government measure. About two weeks after crop was cut I hauled it in the barn. As a result the oats are light in color and heavy in quality. My oats crop was the best yielding of any the neighbors and many as they passed the field said it was the nicest looking field of oats they had ever seen.

Adam Von Stein, Hancock Co., Ohio.

	Yield Bushels	Color	Straw
Early Varieties			
Gopher	59.3	White	Stiff
Fulghum	58.8	Red	Medium
lowar	55.6	White	Weak
Sixty-Day	54.5	Yellow	Weak
Medium Varieties			
Wayne	61.1	White	Stiff
Miami	56.8	White	Medium
Big Four	56.4	White	Medium

Scarff's Wayne Oats

NEW WHITE VARIETY — INTRODUCED BY OHIO EXPERIMENT STATION WHERE IT HAS MADE
REMARKABLE YIELDS. ONE OF THE BEST OF ALL MID-SEASON KINDS FOR OHIO
See Table Above for Yield

FIELD OF WAYNE OATS

We have grown Wayne Oats on our farms for three years and each season the quality has been extra fine with yield of above 60 bu. per acre. It has a good stiff straw which prevents lodging except in extreme cases. The grain is large and plump. Hull is thin and grinds easily. This is a year when every effort should be made to insure a heavy crop. We have priced our oats low to give you every advantage possible. Your increased yield will pay you many times for having used Wayne seed. Order as soon as you know your requirements as our stock of good seed is not large. Price, per bu., \$1.00; 10 bu. lots, 90c per bu.; 25 bu. lots or over 85c bu.

Scarff's Fulghum Oats

Early—Heavy Yielder—Stiff Straw

Fulghum is an Ideal Nurse Crop for Clovers

Fulghum is a strain of awnless red Oats; matures very early. The straw is stiff, taller than the average oats and produces good yields in dry and average seasons when other varieties are practically failures. Sow as early as it is possible to put oats in the ground. Always the best yields are from the early drilled fields. Productiveness, probably more than any of its other good qualities, has contributed greatly to the wide popularity it has attained. We have reports of exceedingly heavy yields that other and later varieties will find hard to beat in seasons favorable for them. Fulghum stools out splendidly and has large heads of fine plump grains. Price, per bu., \$1.00; 10 bu. lots, 90c per bu.; 25 bu. lots or over 85c bu.

NOTE THE OATS TESTS ON PAGE 43

Fulghum and Gopher are right at the top with heavy yields over other kinds. This is true not only at the Experiment Stations but out on your farms and our farms. Year after year they keep on making these good yields.

Treat Oats and Barley with Formaldehyde Dust. Most Effective Dust Control of Smut.

Dry Dusts, which contain penetrating gases are rapidly replacing the wet grain treatment formerly recommended as the best control. The cost per acre is comparatively small, not exceeding 12 cents.

Formo-Dust is rapidly and easily applied. It liberates the gas rapidly enough to kill smut spores without injuring the grain in the process of germination. Grain should be treated at least 12 hours before sowing. It is not

injurious to stock and treated grain, if left over after sowing, may be fed with safety. It requires 2½ to 3 ounces of dust per bushel of grain. A 5-lb. can will treat 25 to 30 bushels. Price, per 5-lb. can, \$1.50.

Scarff's Franklin Oats

Variety tests running three to five years and with no less than four kinds and as many as ten varieties in the counties of the state have demonstrated very conclusively the yielding ability of Franklin Oats. IN THESE TRIALS IT HAS YIELDED HEAVIEST OVER ALL KINDS TESTED IN MIAMI, MADISON, HAMILTON, CLERMONT AND MAHONING COUNTIES. No other variety yielded so many oats over so wide a territory. Franklin is an outstanding variety and to get the best results keep your seed pure.

Franklin Oats originated as a plant selection made in 1922 from the Fulghum variety. Its characteristics as compared with Fulghum are as follows: The straw is longer and decidedly stiffer, it matures slightly later than Fulghum, has an open panicle type of head, while the heads of typical Fulghum tend toward the side-head type. The color of chaff of Franklin oats is white while the chaff of Fulghum is yellow. The kernel color is like that of Fulghum, (red). The head type and chaff color should make it rather easy to identify this variety and to maintain pure seed stocks. Franklin oats is nearly free of abnormal types that occur so frequently in Fulghum. Price per bu., \$1.00; 10 bu. lots, 90c per bu.; 25 bu. lots or over 85c bu.

FULGHUM or FRANKLIN OATS make ideal nurse crops for Alfalfa. They have very few leaves, mature early and produce a good crop, too. One bushel seed Oats per acre with 12 to 15 pounds Alfalfa has always given us a good stand. **Fight Canadian Thistles with Alfalfa.** The only profit making crop that will smother them out. We practically reclaimed 30 acres of heavy infested thistle grown with Alfalfa.

In the above plots Franklin was compared to two other early strains of Oats. Note how well the Franklin stands and others have completely lodged.

VELVET BARLEY

LONG AWNS BUT SMOOTH AS VELVET—YIELDS AS HEAVY OR HEAVIER THAN BEARDED VARIETIES—DISEASE RESISTANT. SIX ROWS—STIFF STRAW THAT WILL NOT LODGE EASILY.

This new variety was originated at the University of Minnesota and there has outyielded all other kinds. The Ohio State University and Experiment Station have also had good results. It is a heavy yielder and although we had general low yields of both Barley and Oats of all varieties last season it has always outyielded the other common kinds.

This Barley has long heads and long awns which are smooth as velvet. Handles like Oats. Matures same season as other kinds. Price, per bu., \$1.25; 10 bu. lots or over, \$1.20 bu.

FALL BARLEY

This variety has come quickly into prominence principally because of the high yields it has been making the last few years. Yields of 60 to 80 bushels are not uncommon. Chinch bugs have not bothered this kind as it ripens too early for them. It should be sown latter part of September, and will ripen last of June. Write us this summer for prices.

REMEMBER BARLEY ALMOST EQUALS CORN IN FEEDING VALUE AND MATURES IN JULY. FOR QUICK FEED SOW BARLEY. IT WILL TIDE YOU OVER UNTIL THE NEW CORN CROP RIPENS AND PAY YOU BIG DIVIDENDS.

HAMPSHIRE RAISE LARGE LITTERS

Hampshires are the farmer's ideal type hog. The pork barrel is the ultimate proof of the merit of all breeds and Hampshires have demonstrated their ability to produce a profit when other kinds failed. We have raised Hampshire hogs on our farms for many years and because of our feeding operations, the same exist on every farm, they have proven highly satisfactory and very profitable.

We offer especially, young fall 1935 males and females. Let us price you foundation for a pure bred herd. We will gladly send you information regarding stock of any age.

Plant for Early Hog Pasture

CANADIAN FIELD PEAS

When sown with Oats at rate of one bushel peas and one bushel Oats (preferably Fulghum) make a wonderful large amount of quick pasture or hay as you may desire to use them. Peas are a legume almost equal to clovers. Sow same time as oats. Price, per bu., \$3.00.

BLUE CLARAGE CORN

(described on page 36), and Illini Soy Beans (described on page 42) make the best possible combination to turn hogs on. You can generally turn in at least ten days earlier than with any other variety. The blue corn has a sweet taste and the beans will furnish the necessary protein. Try this combination.

DWARF ESSEX RAPE

Dwarf Essex Rape is a pasture plant for all kinds of livestock—sheep, cattle, and swine; and is most valuable for fattening sheep. As it grows very rapidly, the pasture will be ready in five weeks from the time of sowing. Unlike other forage plants, rape can be sown at any time during spring and summer, so a good pasture may be had whenever it is needed. Dwarf Essex Rape will prepare sheep and hogs for market better in less time than any other forage plant.

It may be sown in corn when this is cultivated the last time. Good results are generally obtained for late fall pasture when Dwarf Essex Rape is sown after the spring grain has been harvested. When sown broadcast, 5 to 6 pounds may be sown per acre. Price, per lb., 10c; 10 lbs. or over, per lb., 9c.

Dwarf Essex Rape

TIMOTHY SEED

Sow only seed of good quality and high purity. Timothy seed should be in all grass mixtures. It will catch when other grasses will not. Do not fail to sow the best which will cost you no more and good seed many times is the difference between a good crop and a failure. We have only the very best Timothy seed. Price, per bu., \$2.25.

SPECIAL BARGAIN

We have a quantity of Alsike Clover and Timothy Seed that is mixed in about the right proportion to sow, 18% Alsike, balance fine grade Timothy. We can quote you a special bargain price on this seed. Both the Alsike and Timothy are first class in every way, clean and high germination.

We are offering this seed at practically the price of Timothy alone. Price, 20c per pound.

SPECIAL PERMANENT PASTURE MIXTURE

Consists of Kentucky Blue Grass, Timothy, Alsike, Red Clover, Alfalfa, and Yellow Sweet Clover, in just the right proportions for a good sod. Sow at rate of 14 pounds per acre. Price, 20c per lb.

For wet spots in the field or for wet fields we have a special mixture. Please specify when ordering. Price of mixture for wet ground, 23c per lb.

RED TOP A grass valuable in every mixture, grows on any soil and is the best wet land variety we know. It is drought resistant and a vigorous grower. Price, 12c per lb.

ORCHARD GRASS A very desirable grass especially where there is some shade. More leafy and taller than other grasses. Ripens earlier than Timothy. Thrives well on most any soil. Is very nutritious if cut when in bloom. Price, 15c per lb.

KENTUCKY BLUE GRASS A hardy perennial grass familiar to everyone. Where permanent pastures are desired it should be sown with other grasses about 15 lbs per acre. When sown alone 40 lbs. per acre. Will grow anywhere. Price, 20c per lb.; 100 lb. lots, 16c per lb.

SWEET CLOVER

White Blossom

Will grow in any part of the United States and will thrive in poorest sandy soil where no other kind will grow. Ranks first of all clovers to enrich your soil. Sweet Clover sown in the spring can be cut for hay in same fall sown. Sow it in your corn at last plowing. Wonderful as pasture second year. Has great food value as well as being the greatest soil builder. The seed is very reasonable in price and you can afford to sow some at least. Price, per bu., \$4.00.

Yellow Blossom

A biennial similar to white except growth is not so strong, stems are finer and a more abundant supply of leaves is produced. Makes finer grade of hay. Price, per bu., \$4.50.

"Grundy Co" or Dwarf

This strain of biennial White Blossom Sweet Clover is sometimes known as Dwarf Sweet Clover because of the fine stems and growing only about three or four feet high. Preferred by many for hay the second season as it does not get so rank. Price, per bu., \$4.50.

White Sweet Clover

IMPORTANT!

Send us the list of seed you are needing this spring and allow us to quote you our firm price on the lot. Prices of seed fluctuate and we will be pleased to give you our very best quotation. All seed prices subject to change without notice.

Alfalfa

Heaviest producer of the best hay known. Will yield greater returns for the money expended than any other crop you can grow. Alfalfa is a wonderful soil builder. Good profits come from its use as pasture for hogs.

FOR MILK COWS THERE IS NO OTHER HAY THAT WILL EQUAL ALFALFA TO KEEP UP THE FLOW OF MILK.

Alfalfa is one of the most profitable farm crops for three reasons: The tonnage per acre which it produces, its value as a feeding crop, and its soil enriching properties. Alfalfa is no longer an experiment, and it has been grown under greatly varying conditions of soil and climate with wonderful success.

KANSAS SEED Alfalfa seed produced in northern Kansas is being used extensively by farmers in Ohio and surrounding states. In our experimental work it has shown itself as hardy and as heavy a producer of hay as that from other states. It is cheaper and we recommend it to you. Price, per peck, \$3.50; ½ bu., \$6.00; bu., \$11.00.

NORTHWESTERN SEED This seed coming from the northwestern states has always been the hardiest of the common Alfalfa. Where you want to leave your field as long as possible we would use seed of this origin. Our seed is clean and of good quality. Price, per peck, \$4.00; ½ bu., \$6.50; bu., \$12.00.

GRIMM ALFALFA This seed is generally sown where there is trouble in pulling from severe freezing and thawing. This variety is a general favorite in many sections. The Grimm generally produces a spreading or crown type of root system that anchors it firmly in the soil. It is said by many that a field of Grimm will outlast other strains. Our seed comes in sealed bags of Verified Origin seed. Write for samples. Certified Seed, pk., \$6.00; ½ bu., \$11.50; bu., \$22.00.

Sow Nurse Crop with Alfalfa

EARLY OATS OR VELVET BARLEY SOWN AT RATE OF 1 BU. PER ACRE IS NOT ONLY ESSENTIAL BUT IS IDEAL TO SOW WITH ALFALFA. YOU SECURE GOOD CROP OF GRAIN AND IS ADDED INSURANCE OF GOOD STAND OF ALFALFA. BE SURE TO INOCULATE ALFALFA SEED. (See Page 48.)

Our prices for Alfalfa Seed of the very best quality.

Nebraska Grimm—Per peck, \$4.00; per ½ bu., \$7.00; per bu., \$13.00.

Idaho Grimm—Per peck, \$4.25; per ½ bu., \$7.50; per bu., \$14.00.

Certified State Sealed.

Utah or Idaho—Per bu., \$18.00; per ½ bu., \$9.50; per peck, \$5.00.

Canadian Variegated Grimm Alfalfa

(Ohio Grown)—one of the heaviest producers of good quality hay in the Ohio tests. It is very hardy and is outstanding in every way. Ohio grown seed is by far the best. Price, per bu. \$14.00.

Medium Red Clover

The value of this great clover need not be emphasized for it is recognized as the greatest of the legumes. It is lower in price and you will profit greatly by sowing it this season. Our seed is certified by the Federal authorities as to origin and thoroughly analyzed and tested. Be sure of your seed. Many failures have been due to poor seed. Write for Sample.

We offer several grades of Red Clover and will be pleased to send you samples and prices of lots you may be interested in. Our prices for the very best grade of Domestic Seed, per peck, \$4.00; ½ bu. \$7.50; bu., \$14.00.

MAMMOTH (SAPLING) CLOVER. This variety is an enormous yielder of hay of excellent quality, is strong grower and preferred by many growers of the clovers. Price, per bu., \$14.50.

ALSIKE CLOVER Much like red clover except has white blossom, is not so tall and finer stemmed. Seed is smaller and goes farther—sure catch and less liable to freeze than red clover. Many sow mixture of red and Alsike. We can verify origin of all our seed and have only one grade, which is best we can possibly secure. Price, per bu., \$15.00.

WHITE DUTCH CLOVER Lawn and pastures—makes a small compact growth, covering the ground completely. Can be sown either in spring or fall. Price, per lb., postpaid, 40c; by express not prepaid, lb., 35c.

KOREAN LESPEDEZA This new Clover has come into prominence very quickly the last few years because of the wonderful possibilities it offers, especially in the southern half of our state and farther south. It will grow on the poorest soils. It is a wonderful pasture crop and a quick soil builder. It is an annual clover but reseeds itself very readily and maintains a permanent stand. Our seed is of good quality. Price, per bu., (25 lbs.) \$2.00.

SUDAN GRASS Produces an immense yield of nutritious hay. Can be sown as late as July. Sometimes sown with Soy Beans with splendid results. It is easy to cure and is relished by stock. A small patch will make a surprising yield for you. Price, per lb., 6c; per 100 lbs., \$5.00.

INOCULATE ALL LEGUMES

Inoculation causes nodules to develop on roots of all legume crops. In these nodules is gathered Nitrogen from the air and converted into plant food in the soil. Proper Inoculation adds approximately 100 pounds Nitrogen per acre.

Inoculation prices and description on page 48.

Sudan Grass

Special---Lawn Seed---Special

We offer a special mixture of extra good quality Lawn Seed that we do not hesitate to recommend very highly. Many mixtures carry high percentages of objectionable weeds that soon smother out the grass itself. We mix only the best grades of seed which insure a good stand of grass. You cannot afford to take chances with your lawn as once you have sown the weeds they are very difficult to get rid of. The best policy is to sow clean seed. We mix two grades of seed, one for ordinary seeding and another for shady spots. One pound of seed will sow approximately 250 to 300 square feet.

"HEAVY SOD" MIXTURE—Price, per lb., 40c; 5 lb. lots, 35c per lb., postpaid. By express not prepaid, price per lb., 35c; 5 lb. lots per lb., 30c. Ask for prices in larger quantities.

"SHADY SPOT" GRASS SEED—Prices, 5c per lb. higher than Heavy Sod Mixture.

SENECA BEAUTY POTATOES

This old favorite is one of the best of the potato varieties for home use. It cooks quickly, the skin bursting from the flesh, which almost falls to pieces. It has a delicious flavor that is unequalled. It is a heavy yielder and no home garden should be without Seneca Beauty potatoes. We have a fine lot of seed and recommend them to you very highly. There are two strains, Red and White, both the same in cooking qualities. Ours is the White. Price, per bu., No. 2 Seed (medium size), \$1.00.

Treat seed with new Semesan Bel, instantaneous dip, for added insurance of a good crop of clean potatoes. Full description on page 49.

POTATO EYES BY MAIL (Postpaid)

Potato eyes have proven absolutely satisfactory for planting and are producing large yields for our customers everywhere. We can supply the following varieties: Seneca Beauty, Early Triumph, Early Ohio, Irish Cobbler and Late Petosky. Order your seed today. Prices, 12 eyes, 25c; 50 eyes, 50c; 125 eyes, 75c; 250 eyes, \$1.25; 500 eyes, \$2.25; 1000 eyes, \$4.00.

— NOD-O-GEN —

A Pure Culture Inoculator for All Legume Crops

NOD-O-GEN is a high quality jelly culture of living nitrogen-gathering bacteria containing all the essentials for healthy bacterial growth. The bacteria supplied through NOD-O-GEN inoculate the seed of legume crops.

NOD-O-GEN causes nodules to develop on the roots of legume crops. In these nodules is gathered nitrogen from the air and converted into plant food. This not only saves the plant food in the soil, but inoculating with NOD-O-GEN adds approximately 100 pounds of nitrogen per acre when the legume crop is turned under. NOD-O-GEN improves your crops in yield and quality.

NOD-O-GEN has been thoroughly tested and is guaranteed to reach you in good condition, with sufficient proper strain of fresh and vigorous bacteria, without contamination. It is extremely simple to use and has always been sold at a

reasonable price, costing but a few cents for each acre. It is the type of culture most strongly recommended by all agricultural authorities. Jelly cultures have proven more efficient, however we can offer either Jelly or Dust.

Prices for NOD-O-GEN:

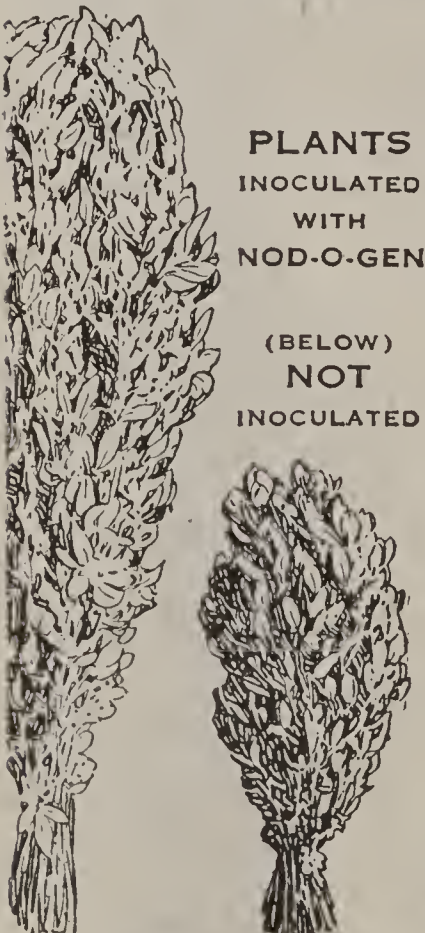

For Alfalfa, Sweet Clover, Red Clover, and other clovers (specify which): ½ bu. size, 25c; 1 bu. size, 40c; 2½ bu. size, 75c.

For Cow Peas, Field Peas and Beans and Vetches (specify which): 1 bu. size, 25c.

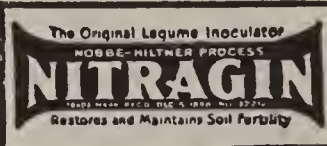

For Soy Beans: 1 bu. size, 30c; 2 bu. size, 50c; 5 bu. size, 90c; 10 bu. size, \$1.75; 25 bu. size, \$3.00.

For Garden Peas, Sweet Peas, Garden Beans and Limas: Garden size, 15c.

DUBAY SEED DISINFECTANTS

Semesan Jr.

Every corn grower knows the importance of securing a good stand. But good stands, especially for early plantings or when the soil is cold and wet, are hard to get. Too many missing hills and too many hills with only one stalk usually leave a stand that is only fair. That's what cuts into your corn income year after year.

New Improved Semesan Jr. should help to give you better stands. It generally protects the seed from decaying, and the seedlings from blights and root rots caused by such fungi as *Diplodia* and *Gibberella*. In most of the Iowa and Illinois tests reported use of Semesan Jr. treatment of the seed increased the stand over untreated seed by 5 to 15%.

In many sections last year was a poor seed corn year. Your seed may not be up to its usual quality. Don't take chances with it. A little time spent in testing it for germination and a small investment in **New Improved Semesan Jr.** will usually pay big returns at harvest.

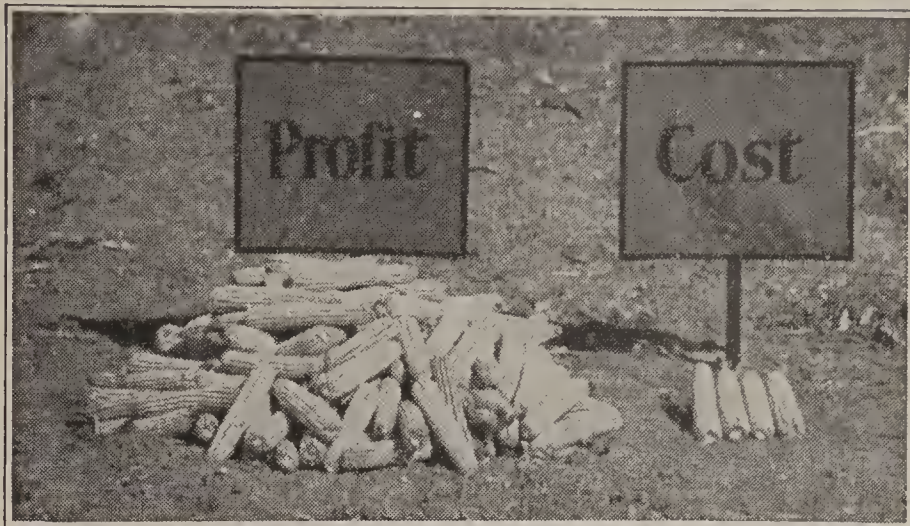

Semesan Jr.

A dust disinfectant for the control of ear rot and stalk rots of **CORN**. Use 2 oz. per bushel of seed, making cost about 4 cents per acre. Price, 4 oz., 35c; 1 lb., \$1.00.

Semesan Bel

An instantaneous dip disinfectant for **SEED POTATOES**. Most extensively used and most effective treatment for control of seed borne disease organisms that cause rots and incidentally much lower yields. It stimulates speedy germination, healthy growth and early maturity. One pound will treat 60 bushels of seed. Prices, 4 oz., 50c; 1 lb., \$1.65; 5 lbs., \$7.00.

Write for Free Booklet on crop in which you are interested.

FORMO-DUST A Dry Formaldehyde Treatment for Smut on Oats and Barley

Smut is caused by a fungus which enters the plant soon after the grain germinates. The seeds or spores of Oat and Barley smut adhere to the roughened surfaces of the grain and in the crevices of the hulls. They germinate along with the grain and soon enter the young tender plants where the fungus continues to grow and develop as a parasite until it matures. It is not uncommon for smut to cause loss of 25% of the crop.

Dry Dusts, which contain penetrating gases, are rapidly replacing the wet grain treatments formerly recommended as the best control. The cost per acre is comparatively small, not exceeding 12c. Formo-Dust is rapidly and easily applied. It liberates the gas rapidly enough to kill smut spores without injuring the grain in the process of germination. Grain should be treated at least 12 hours before sowing. It is not injurious to stock and treated grain. If left over after sowing, may be fed with safety. It requires 2½ to 3 ounces of Dust per bushel of grain. A 5 lb. can will treat 25 to 30 bushels. Price, per 5 lb. can, \$1.50.

NO-CROW

Crow, Bird and Animal Repellent

Corn and other seeds treated with No-Crow will be perfectly safe. Crows, pigeons, moles, pheasants, black birds, larks, gophers, wood chucks, squirrels, etc., hate No-Crow and will not touch treated seeds.

This non-poisonous repellent avoids loss of seed and labor of replanting, acts as a fungicide and prevents seed from rotting in the ground, thus insuring a larger yield per acre. No-Crow is economical, costing about 10c per acre of planted ground. It is easy to use. Put

1 bushel in tight box or can and pour on one-half pint of No-Crow. Mix and seed is ready to plant. Price, ½ pint 50c, pint 85c, quart \$1.25, gallon \$3.50.

VESFUME

GRAIN FUMIGANT

For Killing Weevils, etc.

A liquid which kills by fumes that it generates through evaporation. Being four and a half times heavier than air, these fumes travel downward, penetrating into every crevice below the point where it is applied. It is guaranteed to kill weevils, moths and

other grain insects in all stages of development.

VESFUME is safe under all fumigating conditions. It does not injure human health or life. It is non-contaminating and does not change the odor, taste, appearance or baking qualities of flour or grain. Neither does it affect the germinating seed. **VESFUME** evaporates completely, leaving no residue or odor and involves no risk of fire or explosion. Use one quart **VESFUME** for every 125 bushels of grain. Price of **VESFUME**: Qt., \$1.25; gal., \$4.00.

Eradicate Canadian Thistle, Quack Grass, etc., with Sodium Chlorate-Limestone Mixture

There is now commercially available a mixture of sodium chlorate (75 per cent) and ground limestone (25 per cent) for use in the control of small patches of noxious weeds. This mixture was originally suggested and tried experimentally by the Agronomy Department, Ohio Agricultural Experiment Station, at Columbus, in 1932.

This fine-textured, non-caking, drillable mixture can be applied readily by hand, with a lawn fertilizer broadcaster, or through the fertilizer attachment of a grain drill. This direct application is far less laborious than preparing and applying chlorates as spray. The use of such a dry mixture results in adequate application, which are seldom attained where chlorates are applied as sprays.

Price, 100 lb. Drums, \$8.00. Can be shipped only in 100 lb. drums which will treat around 1/5 acre.
